## MAGNITUDE OF VICTORY GROWS

British Forces Make Headway in Northern France.

BATTLE LASTS THREE DAYS

German Losses Are Placed at About Ten Thousand Men and Over Seventeen Hundred Are Taken Prisoners—British Capture Three Lines of Trenches and a Fortified Work.

London, March 15.—The magnitude of the British victory around Neuve Chapelle, in Northern France, last week continues to grow, as evidenced by a statement from the British war office, which declares that in three days' fighting the German losses could not have fallen far short of 10,000 men. Prisoners to the number of 1,720 were taken by the British.

Regarding these operations the French official statement says:

"The success gained by the British armies at Neuve Chapelle proves to have been absolutely complete. They captured three lines of trenches and a fortified work. The enemy suffered great losses."

The French war office also tells of advances in the Champagne and Argonne regions, but Berlin declares that all the attacks by the French in Champagne broke down under the German fire with heavy losses to the French.

In the Eastern zone the expected battle in Russian Poland around Przrasnysz is developing slowly, while both Russians and Austrians claim to have made gains in Galicia and the Carpathian mountains.

Shipping circles in England are disturbed over the remarkable activity of the fast German submarine U-29, which for three days has been torpedoing steamers at various points off the Scilly islands and in the English channel.

The U-29 has attacked not less than eight steamers, five of which she sank.

## MANY BRITISH SHIPS LOST

Admiralty Issues Report From Beginning of the War.

London, March 15.—The admiralty issued a report giving the total number of British merchant and fishing vessels lost through hostile action from the outbreak of the war to March 10.

The statement says that during that period eighty-eight merchant vessels were sunk or captured. Of these fifty-four were victims of hostile cruisers, twelve were destroyed by mines and twenty-two by submarines. Their gross tonnage totaled 309,945.

In the same period the total arrivals and sailings of overseas steamers of all nationalities of more than 300 tons net were 4,745.

Forty-seven fishing vessels were sunk or captured during this time. Nineteen of these were blown up by mines and twenty-eight were captured by hostile craft.

## LONG LEGAL BATTLE AHEAD

Harry K. Thaw Is Acquitted on Conspiracy Charge.

New York, March 15.—Harry K. Thaw, acquitted of conspiracy in escaping from Matteawan, faces a renewal of the determined efforts of New York state to send him back to the asylum.

Almost endless litigation seems to be in sight as the result of the verdict. The words of acquittal had scarcely died on Foreman Bailey's lips when Deputy Attorney General Cook was on his feet with a motion to have Thaw recommitted to Matteawan.

This was opposed by John B. Stanchfield, chief of Thaw's counsel, on the ground that the court had under advisement a motion to return Thaw to New Hampshire.

In the meantime Thaw occupies his old cell in Tombs prison, the cell in which he was locked up during the months that elapsed from the night he shot and killed Stanford White, nearly nine years ago, to his removal to Matteawan.

## PREPARE TO RECEIVE JEWS

Large Emigration Expected After End of the War.

New York, March 15.—The need of preparation for the reception of large numbers of Jewish people who are expected to emigrate from Europe to this country at the end of the war was urged by President Leon Sanders of the Hebrew Sheltering and Immigrant Aid society of America at its sixth annual meeting here. Various cities of the country were represented by delegates.

PAUL POIRET.

Famous Paris Dressmaker Is an Officer in French Army.

## MAIN OBJECT IS TO DEFEAT ENEMY

German Chancellor Hopes for an Early End of War.

Berlin, March 15.—A declaration that Germany cannot yet discuss in detail all the questions that must be solved at the consummation of peace is made by Chancellor von Bethmann-Hollweg, in replying to a letter from a friend who wrote regarding the discussion of peace terms at the present time.

"At a time when the struggle is progressing toward the object of war, the defeat of our enemy, and while Germans in the field and at home are ruled by a single purpose, to win, we cannot yet discuss in detail all the questions which must be solved at and after the conclusion of peace," wrote the imperial chancellor.

"May the day soon come when the fetters shall be struck off from a free conflict of opinions. For that will be, at the same time, the day on which the bloody conflict ends.

"For the present, however, let us prepare in the spirit in which our folk will have to work together in creating conditions of future life. Of course the strife of parties will be resumed, but, as all classes rightly have learned in the hour of need now, internal political conflicts also must be governed by a mutual respect, which includes all classes from prince to workman."

## SUFFER FROM LACK OF FOOD

Meat Disappears From Tables of Poor in Austria-Hungary.

Venice, Italy, March 15.—Private letters from Vienna say that the poorer classes in that city are suffering acutely on account of the scarcity of food. Meat long since has disappeared from their tables. Bread is scarce and high in price, it being almost impossible to buy flour.

Lard costs more than butter. Although eggs, milk and butter have risen greatly in price it probably will become still more difficult to obtain them in the near future, as farmers are unable to procure fodder and are killing their cows and chickens.

## FIVE VICTIMS OF BLAST

Four Boys and One Man Killed in Gasoline Explosion.

New York, March 15.—Four boys and one man were killed and several persons injured in an explosion of a large gasoline tank in the East New York section of Brooklyn.

The explosion wrecked a two-story brick building at the Crew Levick company, which owned the tank, and shattered windows in buildings two blocks distant.

The four boys had just left the company's offices after giving warning of a leak from the tank and met instant death. The man killed was the foreman of the plant, George W. Avery, who was on his way to repair the leak.

## BIG VICTORY OVER RUSSIANS

(By United Press)

Berlin, March 15.—Reports from the German war department this afternoon emphasized the magnitude of the victory of General von Hindenburg's left over the Russians near Augustowo. Fifty-four hundred prisoners were taken.

Sanguinary encounters have taken place in the vicinity of Przasnysz. The strong Russian attacks in the vicinity of Przasnysz have failed and the enemy's losses have been heavy. In the vicinity of the Vistula and elsewhere in Poland the situation is unchanged.

No mention is made of the fighting near Neuve Chapelle, where the British claim that 10,000 Germans were lost.

The Germans successfully stormed the British heights south of Ypres. British gunboats yesterday bombarded the German positions at Ostend, no damage being done.

The French have renewed the offensive in the Champagne district. Attacks in the vicinity of Mesnil were repulsed. In the Vosges mountains engagements continue in several places.

## EITEL FREDERICH'S LENGTH OF STAY

(By United Press)

Washington, March 15.—The state department is this afternoon preparing a definite ruling on how long the Prinz Eitel Frederick can remain at Newport News. No action will be taken in regard to the sinking of the Frye until Germany's official attitude is told. All passengers on the Frederick have been removed.

## ENGLAND'S POLICY IS DEFINED

(By United Press)

London, March 15.—The terms of England's blockade has been made known and announced. All the North Sea coast of Germany is to be blockaded, but warships not to be used. "This may indicate England's intention of retreating from the policy laid down, if protests come in too thick.

## GERMAN CRUISER DRESDEN SUNK

(By United Press)

London, March 15.—The British admiralty announce that the German Cruiser Dresden has been sunk.

## Watchful Waiting

(By United Press)

Washington, March 15.—Mexican affairs are improving with the present conditions and officials are watching the danger that menaces foreigners at Progresso and Manzanillo, Carranza holding both positions.

## Rumored Attack by Boat

(By United Press)

Washington, March 15.—An unconfirmed rumor says that a Mexican gunboat has fired on the U. S. Cruiser Des Moines off Progresso. The source of the report is unknown, and the navy department disclaims receipt of report, although it is stated that Mexican gunboats have been known to be there several days ago, they do not believe there are any in that vicinity now.

## Labor Leader Appointed

(By United Press)

Washington, March 15.—James Neil has been appointed a member of the shipping commission, succeeding William Welsh. Neil is a labor leader of prominence.

## FRANCE CALLS 1916 CLASS OF RESERVES.

Paris, March 13.—The chamber of deputies passed a bill calling the 1916 class of recruits. These recruits will not be sent to the front, however, until after the men of the older classes are utilized.

## GERMAN ADVANCE HALTED IN NORTH

(By United Press)

Petrograd, March 15.—Russian official reports state that the German advance upon Przrasnysz from the north was halted temporarily by the defeat of German detachments from Mlawn. The French attempt to reinforce the Germans before Przrasnysz was checked. These unexpected moves of the Russians have undoubtedly checked the Germans and for the time being delayed the battle of Przrasnysz. The Germans are now in large force north and west of the town.

Defenses are being prepared on the plains by the Germans in which trenches play a large part. The Russians are defending the town.

There is a lull in the fighting in Poland.

Important battles are developing in the Carpathians. The Germans have reinforced the Austrians and attacks have been resumed upon Belograd.

## FALL OF SMYRNA IS PREDICTED

(By United Press)

London, March 15.—The fall of Smyrna before the end of the week is predicted by Athens dispatches this afternoon. More warships have arrived to reinforce the allies and renewed attempts are being made to seize the isthmus above Bulair and cut the lines of communication with Constantinople. Dispatches from Sofia say that the condition in Constantinople is panicky.

## ENGLAND MAKES ANSWER TONIGHT

(By United Press)

London, March 15.—It is officially announced that England's answer to the submarine warfare carried on by Germany will be made tonight, it being reported that it had not actually decided to enforce a blockade, but will reassert merely the right of the allies to place such order into effect. It is stated definitely that the neutrals will formulate protests immediately if desired for presentation to the British government.

## Blockade Collapsing

(By United Press)

Washington, March 15.—It is believed that the Carranza blockade in progress at Mexico City has been abandoned or collapsed, on account of two shiploads of sisal that has been allowed to leave the port.

## MAETERLINCK ATTACKS VACTIAN

(By United Press)

Rome, March 15.—Maurice Maeterlinck, the Belgian author, this afternoon delivered a savage attack upon the Vatican for its stand for neutrality. He said it was unchristian and not like Jesus would have done had the same situation confronted Him.

He claimed the Church was not standing by the oppressed, the poor and the weak. When the Vatican stands aloof, said Maeterlinck, it allies itself with Germany which is rich and oppressing.

Maeterlinck asserted that he does not believe the Italian people favor the triple alliance, Austria, Germany and Italy, in this war.

The attack of Maeterlinck has proved unpopular even with the leading sympathizers of the allies.

## Legislative News

(By United Press)

St. Paul, March 15.—By the adoption of a minority report from the Grain and Warehouse committee this afternoon Rep. Teigen managed to get his bill prohibiting grain gambling placed on general orders. The vote stood 82 to 19 and a near riot preceded the action. During the heated discussion Rep. Lillard called Rep. Teigen a "big bag of wind."

Representative Larimore this afternoon served notice that unless the temperance committee reports out the bill on state wide prohibition before Thursday he will call the bill from the committee.

The efficiency and economy bill has been deferred until 2 o'clock next Monday.

## BEACHEY KILLED IN AIR ACCIDENT

Daring Aviator Falls Into San Francisco Bay.

DROPS SEVEN THOUSAND FEET

Wings of His Monoplane Collapse While Making a Sharp Descent at the Panama-Pacific Exposition. Divers Find and Release Crushed Form of Famous Airman.

San Francisco, March 15.—Lincoln Beachey, the aviator, was killed while making an exhibition flight at the Panama-Pacific exposition. At an altitude of about 7,000 feet Beachey began a sharp descent. The wings of his monoplane collapsed and the machine plunged into San Francisco bay. The body was recovered.

Hillary Beachey, a brother of the aviator, witnessed the tragedy from the deck of the United States transport Crook. The monoplane fell only a few feet away from the transport.

Beachey's spectacular career came to its end in the presence of thousands of horror stricken spectators.

Beachey was completing his second flight when the accident occurred. Having previously electrified the crowd with a series of aerial somersaults the airman sought to add an additional thrill by making one of the most sensational perpendicular drops which usually featured his flights.

The fatal fall is attributed to the fact that for the first time Beachey attempted his sensational aerial acrobatics in a monoplane.

On the first flight all went well and the aviator's familiar tricks were indulged in with the exception of the perpendicular drop. This Beachey had saved for the climax. It proved too much of a strain for the frame of the monoplane.

Beachey Shuts Off Power.

The machine was at an altitude of about 7,000 feet when Beachey shut off his power. For 4,000 feet it dropped headon for the earth and then the aviator grasped his control levers to adjust the planes for the graceful descent which had characterized his previous flights.

When the machine checked its perpendicular drop and straightened out in midair the strain on the single tier of supporting planes proved too great. They crumpled like a collapsed umbrella and the wrecked monoplane, whirling over and over like a wounded bird, plunged downward into San Francisco bay, narrowly missed a vessel docked at the government pier.

A few splintered fragments of the plane showed the thousands who rushed to the water front where the unfortunate aviator's body lay, strapped in its seat, forty feet beneath the surface of the bay.

Divers from the Oregon, searching the shallow inshore waters of the bay, found the crushed form of the airman entangled in the twisted rods and torn canvas of the machine. They freed the body with axes and brought it to the surface.

Beachey was still alive when he struck the water and had suffered no major injury as a result of the fall except a broken leg, in the opinion of Dr. David E. Stafford, who examined the body.

The face, said Dr. Stafford, was discolored from choking and strangling, indicating that death was due to drowning.

Cuts on the aviator's hands were taken to indicate that he had made desperate efforts to release himself from the mesh of twisted wires and rods in which he was entangled.

## GRENADES CREATE BAD ODOR

Germans Also Say French Use Explosive Bullets.

Berlin, March 15.—The war office gave out the following statement: "Several of the enemy's ships shelled, without result, German positions from the vicinity of La Panne and Nieupoit.

"Near Neuve Chapelle, except for one isolated British attack, which was repulsed, there were only artillery duels.

"In Champagne the French again made partial attacks to the east of Souvains and north of Le Mesnil. All of these attacks broke down under the German fire with heavy losses to the French.

"In the Vosges, the weather is better and fighting has been resumed. In the Argonne the French are now using a new sort of hand grenade, which fill the air with a pestilential odor. The infantry also is using explosive bullets which burst into flames when striking objects.

"On the Eastern front, the situation is unchanged."

LINCOLN BEACHEY.

Aviator Falls to Death in San Francisco Bay.

## NOTED PUBLISHER IS DEAD

Samuel Bowles Was Editor of Springfield Republican.

Springfield, Mass., March 15.—Samuel Bowles, editor and publisher of the Springfield Republican, is dead.

Samuel Bowles controlled the Republican since 1878, when his father, the well known editor for whom he was named, died. He was born in Springfield, Oct. 15, 1851.

Mr. Bowles was the fourth of his name. His grandfather, a Hartford printer, founded the weekly Springfield Republican in 1824, his father started the Daily Republican in 1844 and he established the Sunday Republican in 1878.

## NEUTRALITY LINES TO BE MORE RIGID

Requires Stricter Examination of Departing Vessels.

Washington, March 15.—Closer watch than ever before is to be kept in the future on ships which clear from American ports in accordance with the government's determination to make more rigid its precautions against violations of neutrality.

No general orders have been issued to collectors of customs, but it was understood that the collectors at New York and Boston have been told to scan the manifests of all vessels which ask for clearance and to make such investigation as will satisfy them that their papers conform to their cargoes and that no attempt is to be made to violate the neutrality laws.

The recent indictments in New York in connection with the ships which are alleged to have furnished coal at sea to German warships in violation of American neutrality are known to have caused the British embassy to call the attention of the state department to what appeared to be lax enforcement of the law.

## GRAVEDIGGERS HIT BY HIGH COST OF LIVING.

London, March 15.—The gravediggers employed by the borough of Islington, in the north of London, have presented demands for increased wages, owing to the higher cost of living.

"Because of the rise in prices," says their petition to the borough council, "we find it difficult to maintain our families properly. Our work, moreover, should be well paid, for it is arduous and necessitates exposure in all kinds of weather and is extremely dangerous at night."

## GERMAN AIRSHIP WRECKED

Crew of Hydroplane Rescued by Danish Fishing Boats.

London, March 15.—The wrecking of a German hydroplane off the Danish coast is reported in a telegram from Copenhagen to the Exchange Telegraph company.

It is said the crew of the airship was rescued by Danish fishing boats.

## FOREIGNERS ARE RATHER ANXIOUS

Conditions Steadily Becoming Worse in Mexico.

## DISORDERS AT MANZANILLO

Zapata Forces Are Replenishing the Food Supply at Mexico City and the General Situation Has Improved There—Carranza Has Not Yet Repplied to American Protests.

Washington, March 15.—Situations fraught with difficulty have arisen at Progresso, on the Atlantic coast of Mexico, and at Manzanillo, on the Pacific coast, according to word reaching the state department. The Mexico City situation, it was said, has improved and the water and food supply of the capital is being replenished by the Zapata forces.

Wireless reports from the American consul at Manzanillo state that a condition of anarchy prevails there. Carranza troops in possession of the city are unable to maintain order, it was said, and foreigners are apprehensive. The food supply is decreasing, while the Villa-Zapata troops are investing the approaches to the town.

Progresso, the port from which is shipped 90 per cent of the sisal hemp required for binding the wheat crop of the United States, has been ordered closed to foreign commerce by General Carranza. He has dispatched the gunboat Zaragosa and is preparing to send the armored tug Ocampo to enforce the blockade order.

The cruiser Des Moines is at Progresso under orders from the navy department to see to it that there is no interference with American commerce, as, in accordance with international precedent, the right of a de facto government to close a port not in its possession is not recognized.

Strong representations have been made to General Carranza by the United States, but no word has been received as to his attitude. In the meantime the navy department's reports from the Des Moines state that the gunboat Zaragosa had been forced to turn back to Vera Cruz on account of bad weather.

## IRISHMEN JOINING COLORS

John Redmond Says Kaiser Faces a United Empire.

Manchester, Eng., March 15.—John E. Redmond, leader of the Irish Nationalist party, in a speech to 5,000 persons here, pointed out that he often had addressed meetings of Irishmen in Manchester, but never before an assemblage of Irishmen and Englishmen firmly united in a common purpose.

"Ireland has been admitted to her proper place in the British empire, with which she had so much to do in building up, as has England," Mr. Redmond said.

Official figures covering the period up to Feb. 15, he said, showed that 99,790 Irishmen from Ireland had joined the colors, 115,000 from other parts of the United Kingdom and enough more from the dominions to bring up the total to a quarter of a million. Furthermore, the recruiting of Irishmen was proceeding steadily.

"Ten years ago the Kaiser might have found a divided empire," he said, "but he had forgotten the march of events. In fighting for the empire Irishmen are fighting for Ireland."

## ROCKEFELLER RITES SIMPLE

Body of Oil Magnate's Wife Is Placed in Vault.

Tarrytown, N. Y., March 15.—Funeral services for Mrs. John D. Rockefeller were held in the Rockefeller home at Pocantico hills. Only members of the families, close friends and employees of the Rockefeller estate attended.

After the services it was announced the body of Mrs. Rockefeller would be placed in the receiving vault of John D. Archbold in Sleepy Hollow cemetery here until it is decided whether the burial shall take place at Pocantico or in the family plot in Cleveland.

## FRENCH STEAMER IS SUNK

German Submarine Destroys Ship Off English Coast.

Bordeaux, March 15.—The steamer Auguste Consell, from Cardiff to Rouen, with a cargo of coal, was torpedoed by a submarine off Start Point, near the southern extremity of Devon, England, on Thursday afternoon. The crew of twenty-eight men is reported to have been saved by a Danish steamer and taken to Falmouth.

The Auguste Consell, belonging to the Society Les Affreteurs Reunis, was a steamer of 1,852 tons.

Daring Aviator Falls Into San Francisco Bay.

## DROPS SEVEN THOUSAND FEET

Wings of His Monoplane Collapse While Making a Sharp Descent at the Panama-Pacific Exposition. Divers Find and Release Crushed Form of Famous Airman.

San Francisco, March 15.—Lincoln Beachey, the aviator, was killed while making an exhibition flight at the Panama-Pacific exposition. At an altitude of about 7,000 feet Beachey began a sharp descent. The wings of his monoplane collapsed and the machine plunged into San Francisco bay. The body was recovered.

Hillary Beachey, a brother of the aviator, witnessed the tragedy from the deck of the United States transport Crook. The monoplane fell only a few feet away from the transport.

Beachey's spectacular career came to its end in the presence of thousands of horror stricken spectators.

Beachey was completing his second flight when the accident occurred. Having previously electrified the crowd with a series of aerial somersaults the airman sought to add an additional thrill by making one of the most sensational perpendicular drops which usually featured his flights.

The fatal fall is attributed to the fact that for the first time Beachey attempted his sensational aerial accomplishments in a monoplane.

On the first flight all went well and the aviator's familiar tricks were indulged in with the exception of the perpendicular drop. This Beachey had saved for the climax. It proved too much of a strain for the frame of the monoplane.

## Beachey Shuts Off Power.

The machine was at an altitude of about 7,000 feet when Beachey shut off his power. For 4,000 feet it dropped headon for the earth and then the aviator grasped his control levers to adjust the planes for the graceful descent which had characterized his previous flights.

When the machine checked its perpendicular drop and straightened out in midair the strain on the single tier of supporting planes proved too great. They crumpled like a collapsed umbrella and the wrecked monoplane, whirling over and over like a wounded bird, plunged downward into San Francisco bay, narrowly missed a vessel docked at the government pier.

A few splintered fragments of the plane showed the thousands who rushed to the water front where the unfortunate aviator's body lay, strapped in its seat, forty feet beneath the surface of the bay.

Divers from the Oregon, searching the shallow inshore waters of the bay, found the crushed form of the airman entangled in the twisted rods and torn canvas of the machine. They freed the body with axes and brought it to the surface.

Beachey was still alive when he struck the water and had suffered no major injury as a result of the fall except a broken leg, in the opinion of Dr. David E. Stafford, who examined the body.

The face, said Dr. Stafford, was discolored from choking and strangling, indicating that death was due to drowning.

Cuts on the aviator's hands were taken to indicate that he had made desperate efforts to release himself from the mesh of twisted wires and rods in which he was entangled.

## GRENADES CREATE BAD ODOR

Germans Also Say French Use Explosive Bullets.

Berlin, March 15.—The war office gave out the following statement: "Several of the enemy's ships shelled, without result, German positions from the vicinity of La Panne and Nieupoit."

"Near Neuve Chapelle, except for one isolated British attack, which was repulsed, there were only artillery duels."

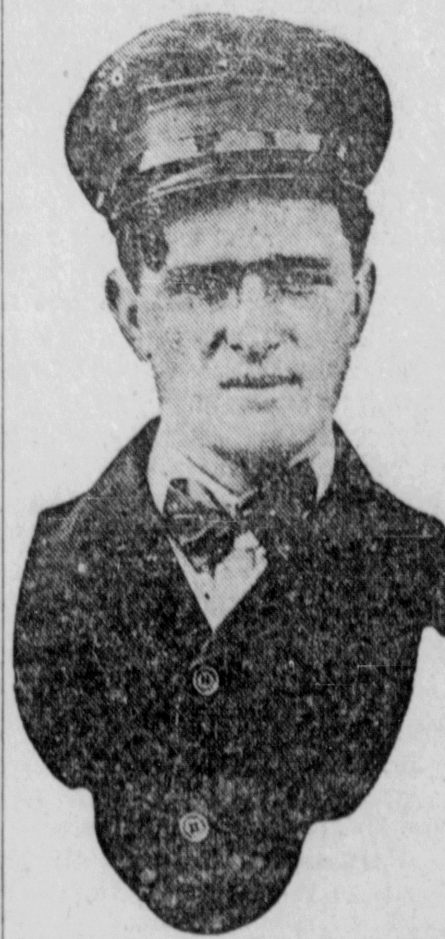

"In Champagne the French again made partial attacks to the east of Souvigny and north of Le Mesnil. All of these attacks broke down under the German fire with heavy losses to the French."

"In the Vosges, the weather is better and fighting has been resumed. In the Argonne the French are now using a new sort of hand grenade, which fill the air with a pestilential odor. The infantry also is using explosive bullets which burst into flames when striking objects."

"On the Eastern front, the situation is unchanged."

## LINCOLN BEACHEY.

Aviator Falls to Death in San Francisco Bay.

## NOTED PUBLISHER IS DEAD

Samuel Bowles Was Editor of Springfield Republican.

Springfield, Mass., March 15.—Samuel Bowles, editor and publisher of the Springfield Republican, is dead.

Samuel Bowles controlled the Republican since 1878, when his father, the well known editor for whom he was named, died. He was born in Springfield Oct. 15, 1851.

Mr. Bowles was the fourth of his name. His grandfather, a Hartford printer, founded the weekly Springfield Republican in 1824. His father started the Daily Republican in 1844 and he established the Sunday Republican in 1878.

## NEUTRALITY LINES TO BE MORE RIGID

Requires Stricter Examination of Departing Vessels.

Washington, March 15.—Closer watch than ever before is to be kept in the future on ships which clear from American ports in accordance with the government's determination to make more rigid its precautions against violations of neutrality.

No general orders have been issued to collectors of customs, but it was understood that the collectors at New York and Boston have been told to scan the manifests of all vessels which ask for clearance and to make such investigation as will satisfy them that their papers conform to their cargoes and that no attempt is to be made to violate the neutrality laws.

The recent indictments in New York in connection with the ships which are alleged to have furnished coal at sea to German warships in violation of American neutrality are known to have caused the British embassy to call the attention of the state department to what appeared to be lax enforcement of the law.

## GRAVEDIGGERS HIT BY HIGH COST OF LIVING.

London, March 15.—The gravediggers employed by the borough of Islington, in the north of London, have presented demands for increased wages, owing to the higher cost of living. "Because of the rise in prices," says their petition to the borough council, "we find it difficult to maintain our families properly. Our work, moreover, should be well paid, for it is arduous and necessitates exposure in all kinds of weather and is extremely dangerous at night."

## GERMAN AIRSHIP WRECKED

Crew of Hydroplane Rescued by Danish Fishing Boats.

London, March 15.—The wrecking of a German hydroplane off the Danish coast is reported in a telegram from Copenhagen to the Exchange Telegraph company.

It is said the crew of the airship was rescued by Danish fishing boats.

## FOREIGNERS ARE RATHER ANXIOUS

Conditions Steadily Becoming Worse in Mexico.

## DISORDERS AT MANZANILLO

Zapata Forces Are Replenishing the Food Supply at Mexico City and the General Situation Has Improved There—Carranza Has Not Yet Replied to American Protests.

Washington, March 15.—Situations fraught with difficulty have arisen at Progreso, on the Atlantic coast of Mexico, and at Manzanillo, on the Pacific coast, according to word reaching the state department. The Mexico City situation, it was said, has improved and the water and food supply of the capital is being replenished by the Zapata forces.

Wireless reports from the American consul at Manzanillo state that a condition of anarchy prevails there. Carranza troops in possession of the city are unable to maintain order, it was said, and foreigners are apprehensive. The food supply is decreasing, while the Villa-Zapata troops are investing the approaches to the town.

Progreso, the port from which is shipped 90 per cent of the sisal hemp required for binding the wheat crop of the United States, has been ordered closed to foreign commerce by General Carranza. He has dispatched the gunboat Zaragosa and is preparing to send the armored tug Ocampo to enforce the blockade order.

The cruiser Des Moines is at Progreso under orders from the navy department to see to it that there is no interference with American commerce, as, in accordance with international precedent, the right of a de facto government to close a port not in its possession is not recognized.

Strong representations have been made to General Carranza by the United States, but no word has been received as to his attitude. In the meantime the navy department's reports from the Des Moines state that the gunboat Zaragosa had been forced to turn back to Vera Cruz on account of bad weather.

## IRISHMEN JOINING COLORS

John Redmond Says Kaiser Faces a United Empire.

Manchester, Eng., March 15.—John E. Redmond, leader of the Irish Nationalist party, in a speech to 5,000 persons here, pointed out that he often had addressed meetings of Irishmen in Manchester, but never before an assemblage of Irishmen and Englishmen firmly united in a common purpose.

"Ireland has been admitted to her proper place in the British empire, with which she had so much to do in building up, as has England," Mr. Redmond said.

Official figures covering the period up to Feb. 15, he said, showed that 99,700 Irishmen from Ireland had joined the colors, 115,000 from other parts of the United Kingdom and enough more from the dominions to bring up the total to a quarter of a million. Furthermore, the recruiting of Irishmen was proceeding steadily. "Ten years ago the Kaiser might have found a divided empire," he said, "but he had forgotten the march of events. In fighting for the empire Irishmen are fighting for Ireland."

## ROCKEFELLER RITES SIMPLE

Body of Oil Magnate's Wife Is Placed in Vault.

Tarrytown, N. Y., March 15.—Funeral services for Mrs. John D. Rockefeller were held in the Rockefeller home at Pocantico hills. Only members of the families, close friends and employees of the Rockefeller estate attended.

After the services it was announced the body of Mrs. Rockefeller would be placed in the receiving vault of John D. Archbold in Sleepy Hollow cemetery here until it is decided whether the burial shall take place at Pocantico or in the family plot in Cleveland.

## FRENCH STEAMER IS SUNK

German Submarine Destroys Ship Off English Coast.

Bordeaux, March 15.—The steamer Auguste Consell, from Cardiff to Rouen, with a cargo of coal, was torpedoed by a submarine off Start Point, near the southern extremity of Devon, England, on Thursday afternoon. The crew of twenty-eight men is reported to have been saved by a Danish steamer and taken to Falmouth.

The Auguste Consell, belonging to the Society Les Affreteurs Reunis, was a steamer of 1,852 tons.

**On Easter  
Morn**

ON Easter morn  
The softened winds to  
every quickened ear  
Breathe music sweet, telling  
the time of year.  
All nature sings, and in glad  
antiphon,  
Blent with the organ's tone,  
The voice of man in praise to  
heaven is borne.

WITH April's fairest of-  
ferings we adorn  
Our altars, emblemizing  
eternal spring  
O'er winter triumphing,  
And good o'er evil, joyous-  
ness o'er gloom—  
Yea, life o'er death, Christ  
risen from the tomb  
On Easter morn.

**Before the First  
Easter Day**

ON Palm Sunday each year the  
minds of millions of Chris-  
tians the world over are occu-  
pied with thoughts of a scene  
in Jerusalem.

On the eastern spur of the Mount of  
Olives lies the little town of Bethany,  
a few furlongs away from Jerusalem.  
On the memorable morning of his en-  
trance into the city Jesus secured near  
Bethany the donkey upon which he  
made his memorable journey to Jeru-  
salem. The occasion was the feast of  
the Passover, and pilgrims from Gal-  
ilee and eastern Judea, the localities in  
which his ministry had been perform-  
ed, accompanied him upon the journey.  
As they beheld him riding on an ass  
(the royal beast in the days of David)  
the hopes of the multitude were sud-  
denly revived. Quickly the news of  
his coming spread through the long  
lines of pilgrims. Those ahead tore  
palm branches from the trees by the  
wayside, while others spread their gar-  
ments and cloaks along the way on  
which he was to pass, while they all  
joined in a triumphant song:

Hosanna to the son of David!  
Blessed is he who cometh in the name of  
the Lord!  
Hosanna in the highest!

Slowly the procession came around  
the southern end of the Mount of  
Olives, with the gorge of the Kedron  
to the south, until the wonderful city  
of Jerusalem burst into view. Then,  
descending into the valley, Jesus en-  
tered the city through this gate in the  
midst of a cheering multitude of peo-  
ple, who waved their palm branches  
before him. Just as the sun was set-  
ting behind the hills he found his way  
to the temple. He sought not a wait-  
ing throne, but a quiet place for wor-  
ship. Then in the hush of the even-  
ing, refusing to give any encourage-  
ment to the selfish material hopes of  
the populace, he quietly returned to  
his humble home in Bethany.

The gate, as we see it today, is en-  
tirely sealed. Many hundred years  
after Christ and passed through it the  
city fell into the hands of the Turks,  
and it was their belief and fear that  
our Lord Jesus was about to return  
and re-enter the city through this  
gate. It was not their will that he do  
this, and they believed that by sealing  
it up in this manner his coming would  
be prevented, and so it remains to this  
day, the Sealed Golden Gate, the most  
remarkable and interesting Biblical  
landmark in the world.

**How to Dye Eggs.**

If you will save the dry, brown skins  
from onions and boil the eggs with the  
onion skins long enough for the eggs to  
be hard you will obtain beautifully  
dyed Easter eggs of various shades of  
brown, with no taste of the onion and  
no danger of poison, as from some other  
dyes.—Woman's Home Companion.

**RAILWAY ENGINES**

Speed of Fast Locomotives and  
How It is Attained.

**BIG WHEELS A NECESSITY.**

But Equally Important Are the Steam  
Valves, the Grates in the Firebox and  
the Ability to Make Steam Rapidly.  
Other Vital Factors.

The average person thinks that the  
bigger the locomotive and the greater  
the diameter of its driving wheels the  
faster it will go, and in the popular  
mind these are the only reasons one  
engine can "run faster" than another.

The locomotive, although one of the  
simplest and best known of machines,  
embodies numerous devices not visible  
to the eye of the casual observer  
which are most vital elements in its  
efficiency and speed. For example,  
much of the power of the big express  
engine depends upon the steam valves  
and the grates in the firebox quite as  
much as it does upon the mere big-  
ness of the driving wheels. At the  
same time it is true that large wheels  
in ordinary fast running are a con-  
venience and in the very highest  
speeds a necessity. It becomes neces-  
sary, of course, to lighten the load as  
the wheels are enlarged and increase  
the speed, which introduces the sec-  
ond phase of the problem—the grates  
and heating surface.

Fast engines, to continue their work  
for a long time at a stretch, must  
make steam very rapidly. To accom-  
plish this the heat of the fire must  
come in contact with the water at a  
great many points. A large firebox  
involves a grate of large area to admit  
air to the fire—a difficult matter since  
but a small distance separates the  
wheels, the width of the firebox being  
thus limited, while the length must  
come within the limit to which the  
fireman can throw his coal.

A third factor is the counterbalance,  
the solid filling fixed between the  
spokes of the driving wheels opposite  
the connecting rods. This is to balance  
the weight of the cranks, parallel rods  
and connections and, in addition, the  
force on the wheels of the weight of  
the moving piston in the cylinder.  
Lacking this balance the wheels would  
roll too rapidly when the rods and con-  
nections were moving downward and  
too slowly when they were moving up-  
ward, thus causing a jerky motion.

However, as the influence of the  
weight is varied by the centrifugal  
force, which, in turn, is greater or less  
according as the speed is high or low,  
it happens that a counterweight which  
is suitable at a speed of forty or fifty  
miles an hour produces an injurious  
"pound" on the rails at seventy-five  
miles an hour.

It follows, therefore, that the weight  
must be heavier than the rods and con-  
nections because a part of its office is  
to balance the piston and other parts  
that slide horizontally and are unin-  
fluenced by centrifugal force. As the  
speed increases the downward motion  
of the weight, as that part of the  
weight of the crank, parallel rods and  
connections and, in addition, the force  
on the wheels of the weight of the  
moving piston in the cylinder. Lacking  
this balance the wheels would roll too  
rapidly when the rods and connec-  
tions were moving downward and too  
slowly when they were moving up-  
ward, thus causing a jerky motion.

So to use an engine successfully at  
the highest speed it is necessary to  
make the counterweight lighter than  
would be correct for moderate speeds.  
The light weights are not necessarily  
dangerous at the lower speed, but their  
use would cause a dangerous pound on

tear on the engine and the track and  
in some cases would even cause un-  
pleasant jerks upon the passenger  
cars. For this reason fast engines are  
seldom built unless they can be used  
in fast service all the time.

Properly proportioned valve open-  
ings are absolutely essential to a fast  
engine. These admit the steam to the  
opposite ends of the cylinder alter-  
nately, as the connecting rod moves  
first forward and then backward, and  
in a fast engine they must admit a  
large volume of steam very quickly.  
The valves must be moved so as first  
to open one passage and close the other  
and then as rapidly as possible close  
the first and open the second.

It will be noticed by even the most  
casual observer that the opening to  
let the steam out of the cylinders into  
the smokestack is several times as  
large as that for admitting the "live"  
steam. But even with this it requires

a considerable amount of power to  
force the steam out with sufficient  
quickness. This must be done in the  
fraction of a second.

There are many engines that can get  
steam into the cylinders quickly  
enough and that are otherwise all  
right for high speed, but which are  
not so arranged to get rid of this  
steam which has been used and is  
only in the way. It is this rapid ex-  
pulsion of the "dead" steam that makes  
the vigorous puffs at the top of the  
chimney that seem to indicate that  
the locomotive is doing a tremendous  
amount of work. It should be remem-  
bered, however, that this noise is not  
the result of real work, but only of  
this after operation, which engine  
builders would avoid. There is a class  
of locomotives, those arranged on the  
"compound system," in which the puffs  
are so faint that the engine would  
seem to be doing nothing at all.

On Easter Morn

ON Easter morn  
The softened winds to  
every quickened ear  
Breathe music sweet, telling  
the time of year.  
All nature sings, and in glad  
antiphon,  
Blent with the organ's tone,  
The voice of man in praise to  
heaven is borne.

WITH April's fairest of  
ferings we adorn  
Our altars, emblemizing  
eternal spring  
O'er winter triumphing,  
And good o'er evil, joyous-  
ness o'er gloom—  
Yea, life o'er death, Christ  
risen from the tomb  
On Easter morn.

Before the First Easter Day

ON Palm Sunday each year the  
minds of millions of Chris-  
tians the world over are occu-  
pied with thoughts of a scene  
in Jerusalem.

On the eastern spur of the Mount of  
Olives lies the little town of Bethany,  
a few furlongs away from Jerusalem.  
On the memorable morning of his en-  
trance into the city Jesus secured near  
Bethany the donkey upon which he  
made his memorable journey to Jeru-  
salem. The occasion was the feast of  
the Passover, and pilgrims from Gal-  
ilee and eastern Judea, the localities in  
which his ministry had been performed,  
accompanied him upon the journey.  
As they beheld him riding on an ass  
(the royal beast in the days of David)  
the hopes of the multitude were sud-  
denly revived. Quickly the news of  
his coming spread through the long  
lines of pilgrims. Those ahead tore  
palm branches from the trees by the  
wayside, while others spread their gar-  
ments and cloaks along the way on  
which he was to pass, while they all  
joined in a triumphant song:

Hosanna to the son of David!  
Blessed is he who cometh in the name of  
the Lord!  
Hosanna in the highest!

Slowly the procession came around  
the southern end of the Mount of  
Olives, with the gorge of the Kedron  
to the south, until the wonderful city  
of Jerusalem burst into view. Then,  
descending into the valley, Jesus en-  
tered the city through this gate in the  
midst of a cheering multitude of peo-  
ple, who waved their palm branches  
before him. Just as the sun was set-  
ting behind the hills he found his way  
to the temple. He sought not a wait-  
ing throne, but a quiet place for wor-  
ship. Then in the hush of the even-  
ing, refusing to give any encourage-  
ment to the selfish material hopes of  
the populace, he quietly returned to  
his humble home in Bethany.

The gate, as we see it today, is en-  
tirely sealed. Many hundred years  
after Christ and passed through it the  
city fell into the hands of the Turks,  
and it was their belief and fear that  
our Lord Jesus was about to return  
and re-enter the city through this  
gate. It was not their will that he do  
this, and they believed that by sealing  
it up, in this manner his coming would  
be prevented, and so it remains to this  
day, the Sealed Golden gate, the most  
remarkable and interesting Biblical  
landmark in the world.

How to Dye Eggs.

If you will save the dry, brown skins  
from onions and boil the eggs with the  
onion skins long enough for the eggs to  
be hard you will obtain beautifully  
dyed Easter eggs of various shades of  
brown, with no taste of the onion and no  
danger of poison, as from some other  
dyes.—Woman's Home Companion.

IN HIS EASTER LILY

RAILWAY ENGINES

Speed of Fast Locomotives and  
How It Is Attained.

BIG WHEELS A NECESSITY.

But Equally Important Are the Steam  
Valves, the Grates in the Firebox and  
the Ability to Make Steam Rapidly.  
Other Vital Factors.

The average person thinks that the  
bigger the locomotive and the greater  
the diameter of its driving wheels the  
faster it will go, and in the popular  
mind these are the only reasons one  
engine can "run faster" than another.  
The locomotive, although one of the  
simplest and best known of machines,  
embodies numerous devices not visible  
to the eye of the casual observer  
which are most vital elements in its  
efficiency and speed. For example,  
much of the power of the big express  
engine depends upon the steam valves  
and the grates in the firebox quite as  
much as it does upon the mere big-  
ness of the driving wheels. At the  
same time it is true that large wheels  
in ordinary fast running are a con-  
venience and in the very highest  
speeds a necessity. It becomes neces-  
sary, of course, to lighten the load as  
the wheels are enlarged and increase  
the speed, which introduces the sec-  
ond phase of the problem—the grates  
and heating surface.

Fast engines, to continue their work  
for a long time at a stretch, must  
make steam very rapidly. To accom-  
plish this the heat of the fire must  
come in contact with the water at a  
great many points. A large firebox  
involves a grate of large area to admit  
air to the fire—a difficult matter since  
but a small distance separates the  
wheels, the width of the firebox being  
thus limited, while the length must  
come within the limit to which the  
fireman can throw his coal.

A third factor is the counterbalance,  
the solid filling fixed between the  
spokes of the driving wheels opposite  
the connecting rods. This is to balance  
the weight of the cranks, parallel rods  
and connections and, in addition, the  
force on the wheels of the weight of  
the moving piston in the cylinder.  
Lacking this balance the wheels would  
roll too rapidly when the rods and con-  
nections were moving downward and  
too slowly when they were moving up-  
ward, thus causing a jerky motion.

However, as the influence of the  
weight is varied by the centrifugal  
force, which, in turn, is greater or less  
according as the speed is high or low,  
it happens that a counterweight which  
is suitable at a speed of forty or fifty  
miles an hour produces an injurious  
"pound" on the rails at seventy-five  
miles an hour.

It follows, therefore, that the weight  
must be heavier than the rods and con-  
nections because a part of its office is  
to balance the piston and other parts  
that slide horizontally and are unin-  
fluenced by centrifugal force. As the  
speed increases the downward motion  
of the weight, as that part of the  
wheel rolls over to the front, makes  
the wheel with its load press down  
upon the rail with so much more force  
than it does when the weight is mov-  
ing upward on the other side that the  
effect upon the rail is as if a heavy  
blow were delivered upon it with a  
hammer.

So to use an engine successfully at  
the highest speed it is necessary to  
make the counterweight lighter than  
would be correct for moderate speeds.  
The light weights are not necessarily  
dangerous at the lower speed, but their

in fast service all the time.

Properly proportioned valve open-  
ings are absolutely essential to a fast  
engine. These admit the steam to the  
opposite ends of the cylinder alter-  
nately, as the connecting rod moves  
first forward and then backward, and  
in a fast engine they must admit a  
large volume of steam very quickly.  
The valves must be moved so as first  
to open one passage and close the other  
and then as rapidly as possible close  
the first and open the second.

It will be noticed by even the most  
casual observer that the opening to  
let the steam out of the cylinders into  
the smokestack is several times as  
large as that for admitting the "live"  
steam. But even with this it requires  
a considerable amount of power to  
force the steam out with sufficient  
quickness. This must be done in the  
fraction of a second.

There are many engines that can get  
steam into the cylinders quickly  
enough and that are otherwise all  
right for high speed, but which are  
not so arranged to get rid of this  
steam which has been used and is  
only in the way. It is this rapid ex-  
pulsion of the "dead" steam that makes  
the vigorous puffs at the top of the  
chimney that seem to indicate that  
the locomotive is doing a tremendous  
amount of work. It should be remem-  
bered, however, that this noise is not  
the result of real work, but only of  
this after operation, which engine  
builders would avoid. There is a class  
of locomotives, those arranged on the  
"compound system," in which the puffs  
are so faint that the engine would  
seem to be doing nothing at all.

**Surety and Purity in Your Baking**

That's what you want, and that's what Calumet is guaranteed to give you—

It is sure in perfect leavening and raising qualities, in wholesomeness, in purity.

Perfectly raised, meltingly tender biscuit, cake, muffins, griddle cakes, are bound to result from its use.

Calumet goes farther than other baking powders—and it's moderate in cost.

Insist on it at your grocers.

Citrolax  
CITROLAX!

Best thing for constipation, sour stomach, lazy liver and sluggish bowels. Stops a sick headache almost at once. Gives a most thorough and satisfactory flushing—no pain, no nausea. Keeps your system cleansed, sweet and wholesome. Ask for Citrolax. H. P. Dunn.—Adv't. mwf

## WOMAN'S REALM

### Musical Literary Club

The Musical and Literary Club composed of the piano pupils of Mrs. W. A. M. Johnstone, will meet at her home tonight at 7:30 o'clock and give the following program.

Paper on the Life of Mendelssohn  
Miss Bessie Paine  
Souvenir, Op. 19, No. 1—Mendelssohn  
Miss Ellen Lind  
Analysis, "Hunting Song" — Mendelssohn  
Miss Gladys Nitterauer  
Song — Mendelssohn  
Miss Mildred Farwell  
Analysis, "Consolation" — Mendelssohn  
Miss Lillian Nelson  
Anecdotes of Mendelssohn — Miss Alma Brown  
Analysis (a), Venetian Gondolo Song Op. 39, No. 6 — Mendelssohn  
Analysis (b) Spinning Song — Mendelssohn  
Miss Ida Peterson  
Venetian Boat Song, No. 12 — Mendelssohn  
Miss Evelyn Erickson  
Capriccio Brillante — Mendelssohn  
Miss Mildred Skauge  
Musical History Game  
Club Members

### Junior Musical Club

The Junior Musical club met at the home of Mrs. W. A. M. Johnstone Saturday evening, March 13. There were sixty-five members and thirty guests present. A very pleasing program was rendered. The annual meeting of the members for the election of officers will be held this month. The election will be followed by a social hour. The date will be announced later. The next program will be given April 3.

### Entertains at Dinner

Prof. and Mrs. W. C. Cobb entertained at a dinner party Friday evening Mr. and Mrs. Walter F. Wieland, Dr. and Mrs. Howard G. Ingersoll, Miss Bessie Wieland and Mrs. Frank G. Hall.

### Twilight Workers

A supper and auction sale will be given Friday evening, April 16, at Walker hall by the Twilight Workers of the Swedish Lutheran church.

### ENGINEER VICTIM OF WRECK

Tramp Injured and Shelburn (Ind.) Depot Partly Demolished.

Shelburn, Ind., March 15.—Engineer Charles Baldwin was killed, a tramp was painfully injured and the Evansville and Terre Haute railway station here was partly wrecked when the Dixie Flyer, the fast Chicago-Florida train, left the rails here.

While the passengers received a severe shaking up none required the services of a physician.

A small stone on the rail at a street crossing is believed to have caused the accident.

### PERSONAL MENTION

Mrs. Mary Horner went to Staples this noon.

Mrs. F. E. Murphy, of Aitkin, was in the city yesterday.

Mrs. J. W. Koop is visiting friends and relatives in Staples.

Miss Minnie Johnston, a teacher of Jenkins, arrived in Brainerd this noon.

Mrs. E. A. Lamb and son, Clement, of Deerwood, were shopping in the city today.

Miss Anna Kraus, the guest of friends in the city, returned this afternoon to her home in Little Falls.

Mrs. Harry Hance, who has been the guest of her sister, Mrs. H. W. Congdon, returned this afternoon to her home in Fargo, N. D.

### DRAMA LEAGUE

Regular Meeting Will be Held on Tuesday Afternoon at the Residence of Mrs. A. W. Ide

The regular meeting of the Drama League will be held on Tuesday afternoon at 3:30 at the residence of Mrs. A. W. Ide. Readings from "The Great Galeoto" will be given by Mrs. Henry I. Cohen.

A full attendance is requested as the final arrangements will be made for the lecture to be given Friday evening, March 19, by Dr. John Walker Powell, of the University of Minnesota, on "The Theatre as a Social Force."

### WARSHIPS ON THE LOOKOUT

Are Ready to Pounce on German Auxiliary Cruiser.

Newport News, Va., March 15.—French as well as British warships are cruising outside the Virginia capes waiting to pounce on Prinz Eitel Friedrich if it should attempt to make for the high seas again, it was learned. There are said to be four of them, two British and two French.

An officer of the English freighter Anglo-Patagonian, which arrived here from Swansea to load horses for the allies, told of the watching cruisers and from him it became known for the first time that the movements of the Eitel Friedrich were known to the allies' war craft for several days before it sought haven in Hampton Roads.

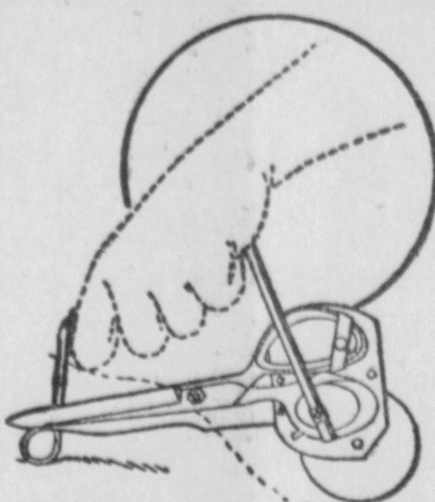

### A Pessimist.

Little Willie—Say, pa, what is a pessimist?

Pa—A pessimist, my son, is a man who derives most of his pleasure from his effort to spoil the pleasure of others.—Chicago News.

## HELPFUL HINTS FOR HOUSEWIVES

Device For Operating Scissors Without Fatigue.

An apparatus has been recently patented which will save the muscles of the hand from the fatiguing labor in operating the scissors. Mounted in this frame, the scissors are merely guided over the lines to be cut, and the work is done automatically. The scissors are secured to a mounting frame, one end of which has a rest to hold the point of the implement just above the surface of the cutting board and a wheel in the rear to which is secured one of the handles of the scissors. Between is a convenient handle which has a slight vertical movement. A slight pressure on the handle drives the device ahead and actuates the blades so as to cut their way through the material as the implement progresses.

### Kitchen Kinks.

When whisking an egg be sure the basin and knife are perfectly dry. There will then be no difficulty in getting it to foam up quickly.

Onions will fry more readily if dipped in milk after slicing.

Paint may be removed from windows with hot vinegar.

Half a pound each of soft soap, sand and whitening, simmered gently in a pint of water for half an hour and kept in a jar, is handy for scrubbing boards and pans.

Apples pared, cored and set into a dish with sugar and water to bake until tender, but not broken, are delicious with custard poured over them.

### Washing a Sweater.

Make clear suds, not too hot, and wash the sweater thoroughly; then rinse in warm water. Do not rub it on the board, and never wring it out. Rub lightly with the hands and let it drain all it will after lifting it from the water. Have a coat hanger ready with an old coat several sizes smaller than the sweater and when you have squeezed most of the water from the sweater, put it on the hanger over the coat and button all the way down the front. Put the hanger on the clothesline and let the sweater dry.

### Sausage With Vegetables.

Take sweet potatoes, carrots and potatoes enough to make one and one-half cupsful of each. Cut in small pieces and partly cook in boiling salted water. The carrots will need more cooking than the others. Put the vegetables in a casserole or deep pudding dish and season with salt and pepper. Curl the sausage above them so the drippings will season the vegetables. Cook very slowly for an hour and a half. Have the vegetables boiling hot when you place the sausage on top. Serve from the casserole.

### Beef Stew.

Cut into small pieces two pounds of any of the cheaper cuts of beef. Add one small, yellow turnip, one carrot, one large onion and a half dozen good sized potatoes, all the salt and about a quart of cold water. The onion should be sliced and the other vegetables diced. Place the meat in the bottom of the kettle and cover with the vegetables. When it is boiling briskly set it back where it will simmer for a couple of hours.

### Fish Chowder.

Cut two pounds fish (cod is best) into one-inch squares. Cut into dice three large potatoes. Put in bottom of kettle a layer of potatoes and a layer of fish, one chopped onion, one teaspoonful salt, one saltspoonful each of pepper and celery seed and teaspoonful of powdered thyme. Boil in one pint of water, then add one quart of milk and half cupful of butter.

### A Handy Receptacle.

Have the bottom step of the back stairs put on hinges, so as to form a small box or cupboard. In this keep the stove blacking, brushes and polishing cloths. The bottom step of the back porch also can be treated in the same manner and the small garden tools kept there.

### Carrots and Onions.

Scrape, slice and boil carrots until tender. Slice onions and fry in bacon or ham fat and when nearly done add the carrots, season, stir well, cover and let cook very slowly, stirring frequently to keep from burning.

### Baked Sausage.

Curl the sausage in a frying pan and cover with a tin cover. Place in a moderate oven for one hour, turning once or twice. This makes it a delicate brown, and it is thoroughly cooked.

## MUCH WORK LOST WHEN BILLS FAIL

Efforts Exerted on Indian and Postoffice Measures Wasted.

EVIL NOT AN UNMIXED ONE

Legislation in These Appropriation Bills Might Not Have Been For Best Interests of the Country at This Time. Lower House Objects to Terms in Resolution Praising Underwood.

By ARTHUR W. DUNN.

Washington, March 15.—[Special.] When a session of congress terminates on the stroke of an hour it leaves a muddled condition in legislative affairs. It also means that much work in the preparation of bills has been wasted. When big supply bills fail it means that much time given to them in both houses was lost.

Take the Indian and the postoffice bills as examples. Both occupied a great deal of time in preparation and both dragged through many days in the house and senate. The rows over the postoffice bill were serious and at one time showed a decided split in the dominant party. Special rules were necessary in order to engrain upon that bill legislation which the postoffice department demanded, and even after all the time and trouble the bills failed. If congress had not expired by limit both bills could have passed in some form.

### Not an Unmixed Evil.

And yet the losses of all the legislation in the appropriation bills and in other measures is not entirely an unmixed evil. For the most part the country is better off without too much legislation. In times like these radical changes in business methods such as were proposed in the postoffice appropriation bill might have done more harm than good.

Besides making an entirely new arrangement in the adjustment of railway mail pay it was also proposed to make a striking change in carrying second class mail. Altogether the defeat of the postoffice bill served to delay important changes in the service which will be given more time next session when there is no time limit.

### The "Lower House."

Members of the house of representatives who have no hopes of going to the senate are objecting to the wording of a resolution which was adopted by the ways and means committee and put in the record at the close of congress. This committee drafted a sort of memorial farewell to Oscar W. Underwood and spoke of his services in the "lower house." Some of the sticklers for equality between the houses do not like the words and think it is undignified for the house to so style itself. Then the resolution refers to the "promotion" of Underwood, and it is asserted that to be made a member of the senate after having been the ruler of the house for four years is not a promotion. Moreover, the word also implies the inferiority of the house, to which objection is made. At the same time it is a promotion, and the senate is the "upper house" in control even if the pay of members is equal.

### No Place For Underwood.

There are no committee vacancies for Underwood in the senate. Unless some Democrat generously gives place to the Alabama senator or additional members are provided for the committees he can find no place on any one of the leading half dozen committees in the senate. If such a place should be created for Underwood on the finance committee he would find himself subordinate to James and Hughes, who were his superordinates on the ways and means committee in the house. Senatorial selfishness is proverbial. No senator will give up anything in the way of a committee place unless he gets something better.

### Stands on His Rights.

There was a discussion in the senate one day about what was proposed to be done, and one of the Democrats, defending his course, said that the proposition was discussed at different times, was rampant in the cloakrooms and went so far as to say what the vice president would do when the time came to make a ruling.

"Leave the vice president out of this," sharply remarked Mr. Marshall. He did not propose to be a party to any manipulation behind the scenes.

"Brigadier General Legislation."

When the army bill was in the senate an attempt was made to insert a provision making some man a brigadier general. Senator Root opposed it and made a point of order that it was general legislation.

"I don't see how it can be called general legislation," remarked the vice president.

"It is brigadier general legislation, which is the worst kind," asserted Senator Root.

### Only Two Promoted.

Only two members of the house became senators on the 4th of March—Underwood of Alabama and Broussard of Louisiana. There were others who wanted to go up, notably Burke of South Dakota, Palmer of Pennsylvania, Murdock of Kansas, Calder of New York, Hobson of Alabama, as well as others who did not get into the race in the primaries or at the election.

## PATENT MEDICINES

AT CUT PRICES

FOR A SHORT TIME ONLY

I am carrying an extra large stock of some patent medicines and to reduce it I am cutting deeply into the prices—giving the profit to my patrons.

## THE NEW CHARTER

Edited by the members of the Charter Commission favorable to new charter.

The new charter to be voted on in April will be distributed before long. The law does not compel the publication nor the distribution of the same. It is being done, however, to give every one an opportunity to read it and then ask questions. Meanwhile it is deemed advisable to give an epitome of parts of the charter, from time to time, explaining the features of these various parts, thereby making it easier for you to read the printed form, and easier to understand when you know in a way what is coming. Often a question will bring out a point which is important but may be overlooked by us. We also invite your contributions to these columns, for after we have explained generally the contents of the charter we will publish arguments on those points which are generally picked out as being plows. Remember we want you to send us your questions. We will answer all that can be answered, and hope thereby to clear up some other voter's mind.

## OUR PREAMBLE

"No form of government can in and of itself produce good results. The most that any plan can do is to provide an organization which LENDS itself to EFFICIENT action, and which at the same time places in the hands of the electorate some simple and effective means for controlling their government in their own interests. Beyond that results can only be obtained thru an enlightened public opinion."

## CHAPTER IV.

Sec. 68 to 89, Inclusive  
Finances

Fiscal year begins April 1st.

All disbursements, except as otherwise provided, made by warrants signed by Mayor and countersigned by president of council. Claims of over \$50.00 must first be allowed by council. What the warrant shall show is specified. Library board hereafter makes its own warrants.

Orders drawn upon each fund kept separate. Cancelled warrants filed by Mayor. Council provides for their destruction or preservation, and an annual audit.

Principal and interest upon bonds and certificates of indebtedness of the city, when due, paid by Mayor out of proper fund upon presentation and surrender to him of such paper. Filed in Mayor's office when cancelled.

Checks drawn upon a city depository to be signed by Mayor and countersigned by President of Council or the president of the board having control of the fund out of which such warrant is to be paid.

The following funds are maintained and are supported by an annual tax levied by the council.

1. Interest Fund. Enough levied for the payment of interest to become due during the next fiscal year upon all bonds and debts of the city, except public utility bonds and certain bonds owned, held by the state.

2. Sinking Fund. For the purchase, or payment when due, of any bond or other funded debt of the city, except certain bonds owned and held by the state.

3. Public Safety. Maintaining and operating Fire, Police and Health departments.

4. Public Library. Maintaining a Public Library. Into this fund also are paid all gifts or devises. This fund is under the control of the Library board.

5. Park. For the acquisition and maintenance of Public Parks, play grounds, baths, gymnasiums, halls and similar places of public recreation, convenience and amusement.

6. Public Welfare. For the acquisition and maintenance of cemeteries, garbage incinerators, hospitals, workhouses, detention houses, lodging houses, houses of refuge and similar institutions for the well being of the unfortunate and delinquent of the city.

7. Public Works. Maintenance of the Highways of the city, and for such repairs thereto as are not payable by special assessment or out of

the permanent improvement fund. Into this fund are paid all taxes or fees upon vehicles.

8. Public Property. For the payment of all Real Property acquired by city, payment for which is not otherwise provided for.

9. Permanent Improvement. For the payment of such proportion of cost of local improvements as shall devolve upon the city. Provision made as to disposition of surplus.

10. Public Utility. For the acquisition, construction, support, maintenance and operation of any Public Utility owned or operated by the city, including payment of interest on any bonds or other indebtedness which may be a lien upon such utility. Further specific provision made regarding what moneys are to be paid into this fund and what money is to be paid out for, and the disposition of surplus.

11. General Fund. For the support of other funds and for the payment of such other Expenses of the City as the council may deem proper and which are not payable out of such other funds.

12. Contingent Fund. For the Mayor to pay expenses incurred by him in preserving safety and well being of the city, not payable out of any other fund. Limited to \$300.00.

13. Permanent Improvement Revolving fund. Into this fund are paid the special assessments for Local Improvements, and interest on extended assessments and proceeds of sales of Permanent Improvement Revolving Fund bonds, and out of this fund is also paid money for the Permanent Improvement Revolving Fund bonds as they fall due.

All such funds are in the custody of the Mayor.

Excepting Funds 1, 2, 4, and 5, the aggregate amount levied by general taxation in any one year for all the other funds shall not exceed ten mills. Fund No. 2 shall receive at least one mill, Funds 4 and 5 each not less than one-half mill nor more than three-fourths of a mill.

City council may authorize Mayor to invest sinking fund in bonds or other obligations, and specific provisions are made in detail covering this entire feature.

At first meeting in July, Mayor makes a detailed report to council, or when otherwise requested, showing the condition of the sinking fund and description of its securities, and provisions are made for taking care of deficiencies.

City may by ordinance issue and sell bonds or certificates of indebtedness. Listed are the many things for which bonds are now sold to raise money, in the main similar to the purposes for which bonds are now sold. The most important addition to this section is that relative to certificates of indebtedness, and reads as follows: "The city may sell certificates of indebtedness in an amount not exceeding \$20,000.00, to run not longer than 10 years, for the benefit of the General Fund in case of failure of the anticipated return from other sources of taxation."

Bonds shall not be sold for less than par value and shall bear interest at not to exceed 5 per cent, and under certain conditions, 6 per cent.

Bonded debt of city shall not exceed 10 per cent of the last assessed valuation.

County Auditor's duties are defined with references to keeping account of the various city taxes collected, and payment and transmission of same to the County Treasurer.

On or before October first Mayor submits to the City Council an estimate of the probable expenditure of the city government for the next fiscal year, specially with reference to various funds, also probable income. Council then determines sum to be raised by taxation, statement is transmitted to county auditor and payment thereof is enforced. Council may sell certificates of indebtedness in anticipation of the collection of taxes for any special fund named deficient. Specific provisions are given for time limits and amounts of such certificates.

Mayor shall keep accurate accounts and up to date with reference to all moneys received and paid out by him, from whence received and to what fund credited. Specific provisions are made at length regarding these accounts.

The council shall constitute the Board of Equalization, but perfect a separate organization when they meet.

Every person aggrieved by an assessment shall have the right to appear in person or by attorney before such board.

After Mayor revises assessment rolls according to equalizations, transmits records to county auditor.

Provides for monthly settlements with Mayor by all city officials or employees collecting moneys.

City council designates bi-annually by competitive proposals the banks for depositories of the moneys of the city. Banks give surety bonds. Mayor makes an annual statement

to council of the total amount of interest received on public funds, said interest goes to the fund from which it shall have accrued.

Property may be taxed specially by council to pay any judgment recovered against the city. Excess collected for such judgment goes into general fund.

Provision is made regarding recourse by legal appeals against the city for claims for audit disallowed by council.

## POPULAR MECHANICS

## Small Faucet Leaks.

Now, it may be of interest to know just what the water loss would be from a leaking faucet, says the Scientific American. Let us assume that a faucet leaks to the extent of allowing the escape of two drops of water per second. In one month the leakage would amount to a little over eighty-four gallons. With water at 25 cents a thousand gallons the money loss per month would be about 2 cents. Should the leak be in a hot water faucet the loss would be greatly increased because of the fuel required to heat the water. With coal at \$5 a ton, burned with the efficiency usually attainable under domestic conditions, the loss in water and heat in the above example would be nearly 10 cents a month. Furthermore, small leaks do not remain small. The constant leakage of faucets wears small passages through the seats and makes tightness impossible. The next thing then is a new faucet with the accompanying plumber's bill, which is notoriously not small.

## Watch Auto Steering Connections.

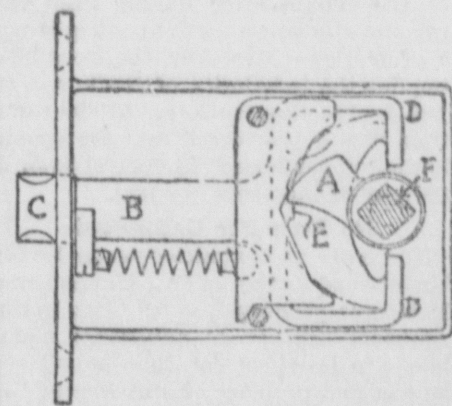

One should always keep a lookout with regard to the wear of the steering connections, for several reasons. In the first place, if the wear shows signs of becoming excessive there is an element of danger which should not be allowed to continue. Then there is the fact that such loose connections would probably entail a lack of alignment of the steering wheels, thus causing excessive wear of the tires, and, in the third place, there is a certain amount of rattle usually caused. On some cars provision is made for taking up wear and tear in the steering connections; on others there is not. In either case, unless the amateur is of a mechanical turn of mind, it is better to get the makers or some capable garage hand to make the necessary adjustments.—Automobile Dealer.

## An Ingenious Door Lock.

A lock that can be locked from one side without a key by the simple turn of the door handle and that when so locked cannot be opened from the other side of the door was patented recently by a New York inventor.

This lock is intended for use on the doors of such apartments as bath-rooms, private offices or doctors' consulting rooms, in which the certainty of absolute privacy is desired without the use of a key.

The diagram shows a section through the lock. At P the bar on which the handles are placed is seen in cross section.

LOCK FASTENS WITHOUT A KEY.

This turns a bar that presses against D D, the two arms of the bolt B, thereby drawing this back with the tongue C, which fastens the door. A is a tumbler that falls into place when the handle on the inside of the door is turned. When it has fallen the door is locked so far as the outside handle is concerned, for the latter handle cannot move the tumbler A, and this is in such position that the bolt cannot move back until A has been turned out of the way, which can be done only from the inside. E is a projection to stop A from turning too far.

## Knew Arithmetic Anyhow.

A teacher of music desired to impress the pupils with the meaning of the signs "+" and "-" in a song they were about to sing. After explaining that "+" meant forte he said, "Now, children, if "+" means forte, what does "-" mean?"

Silence reigned for a moment, and then he was astonished to hear a bright little fellow shout, "Eighty!"

Sin writes histories, goodness is silent.—Goethe.

## \$100 REWARD. \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, O.  
Sold by Druggists. 75c.  
Take Hall Family Pills for constipation.

## NOTABLES IN THE LIMELIGHT

C. P. Anderson, International Law Expert.

Chandler Parsons Anderson of New York, who has been retained by the department of state in an advisory capacity, is an authority on matters of international law. Mr. Anderson's work will deal mainly with questions coming before the solicitor of the department, and in this capacity will collaborate with Counselor Robert Lansing. It is on these two men that Secretary of State Bryan will rely for legal advice on problems that arise from the European war.

Born in Connecticut forty-nine years ago Mr. Anderson was educated at Yale and the Harvard Law school. He was admitted to the bar in 1891, and since 1899 has had an office in New York. In 1896-7 he was secretary for United States and Great Britain of the Rering sea claims commissions. Since that time Mr. Anderson has had a wide experience in matters pertaining to international law. He was one of the counsel for the United States before the Alaskan boundary tribunal in 1903, and also in settlement of the Passamaquoddy bay boundary six years later. He was a special counsel for the department of state under Secretaries Root and Knox. In 1910 he was agent for the United States at The Hague in the north Atlantic coast fisheries arbitration and also a delegate to the far east conference at Washington. During President Taft's administration Mr. Anderson served nearly four years as counselor for the department of state.

## Paid Advertisement.

This advertisement's Costing \$2.70 per issue, is authorized and paid for by the Brainerd Law Enforcement League.

## Who Pays the \$21,000 License?

The one argument used by those who would retain the saloons is the need of the license money. A little thought will reveal the fact that even this comes from the same community to which it is returned in the shape of license.

## Do the Brewers and Distillers Pay It?

No, they do not pay it or if they did they would simply add it to the price of the product and the taxpayers and voters who use the beverage would eventually pay it. So, Mr. Voter, our city is nothing ahead there.

## Do the Saloon Keepers Pay It?

No; they simply add it as one of the costs of doing business and again the taxpayers and voters who use it and those dependent upon them must pay it. Again by this route it comes out of the city.

## Honestly, now, Who Pays It?

Have you ever helped poor families who have been made poor either by the direct or indirect influences of liquor? Every time you do you help pay the license money. The city alone contributed over \$1,400.00 to the poor fund in 1914 of which the large portion was used to help those who spent their money with the saloon that they might help the saloons pay the \$21,000 license money. Then individuals and charitable institutions spend far more in helping in precisely the same manner.

## These are They Who Pay!

The wife who is sent to the wash tub while her husband squanders his earnings in the saloon. The children who are denied proper clothing and shoes that an enlightened (?) public might have \$21,000 to pay the expense of the city which they should be ashamed to accept from the iniquitous business. The young man pays it who sells his birthright to a clean manhood and who accepts instead a broken physical body and a career which brings shame to his parents. The child who comes into the world with a blighted mental capacity and a reduced physical being on account of liquor, pays it. The one who is made insane by its blight, pays it. The home disrupted by divorce caused by liquor, pays it. The home broken and the children sent out to shift for themselves at an early age pays it.

## Like Lifting One's Self By The Boot Straps!

Every cent, Mr. Voter, is taken from the community and realize too, that the \$21,000 received in license does not begin to pay the city for the economical loss occasioned by the saloon. It is a simple problem in economy. Don't be deceived; the \$21,000 is just the money the city cannot afford to accept from the saloon. Think it out for yourself.

THE BRAINERD LAW ENFORCEMENT LEAGUE

## WAVE OF RELIGION.

Searchlight Causes Big Revival in a Panama Hamlet.

War preparations were responsible recently for a temporary revival of religious enthusiasm in the hamlet of Chorrera in Panama. The searchlight installation at the Pacific forts of

the canal has been completed and for several nights practice with the lights was in progress.

The great shafts of light in the sky were noticed at Chorrera, fifteen miles distant, and some of the inhabitants looked upon them as signals from heaven. A religious procession was formed and prayers were said in the church. The parish priest was not

in town the first few nights.

When he returned he found it necessary to destroy the most remarkable revival in his memory by informing his people that the lights were not from heaven, but from the forts of the "Americans." The good man convinced his people, who straightway retired from the church and held a tambourine dance in the public square.

## OUR PREAMBLE

"No form of government can in and of itself produce good results. The most that any plan can do is to provide an organization which LENDS itself to EFFICIENT action, and which at the same time places in the hands of the electorate some simple and effective means for controlling their government in their own interests. Beyond that results can only be obtained thru an enlightened public opinion."

## CHAPTER IV.

Sec. 68 to 89, Inclusive  
Finances

Fiscal year begins April 1st.

All disbursements, except as otherwise provided, made by warrants signed by Mayor and countersigned by president of council. Claims of over \$50.00 must first be allowed by council. What the warrant shall show is specified. Library board hereafter makes its own warrants.

Orders drawn upon each fund kept separate. Cancelled warrants filed by Mayor. Council provides for their destruction or preservation, and an annual audit.

Principal and interest upon bonds and certificates of indebtedness of the city, when due, paid by Mayor out of proper fund upon presentation and surrender to him of such paper. Filed in Mayor's office when cancelled.

Checks drawn upon a city depository to be signed by Mayor and countersigned by President of Council or the president of the board having control of the fund out of which such warrant is to be paid.

The following funds are maintained and are supported by an annual tax levied by the council.

1. Interest Fund. Enough levied for the payment of interest to become due during the next fiscal year upon all bonds and debts of the city, except public utility bonds and certain bonds owned, held by the state.

2. Sinking Fund. For the purchase, or payment when due, of any bond or other funded debt of the city, except certain bonds owned and held by the state.

3. Public Safety. Maintaining and operating Fire, Police and Health departments.

4. Public Library. Maintaining a Public Library. Into this fund also are paid all gifts or devises. This fund is under the control of the Library board.

5. Park. For the acquisition and maintenance of Public Parks, play grounds, baths, gymnasiums, halls and similar places of public recreation, convenience and amusement.

6. Public Welfare. For the acquisition and maintenance of cemeteries, garbage incinerators, hospitals, workhouses, detention houses, lodging houses, houses of refuge and similar institutions for the well being of the unfortunate and delinquent of the city.

7. Public Works. Maintenance of the Highways of the city, and for such repairs thereto as are not payable by special assessment or out of

the permanent improvement fund. Into this fund are paid all taxes or fees upon vehicles.

8. Public Property. For the payment of all Real Property acquired by city, payment for which is not otherwise provided for.

9. Permanent Improvement. For the payment of such proportion of cost of local improvements as shall devolve upon the city. Provision made as to disposition of surplus.

10. Public Utility. For the acquisition, construction, support, maintenance and operation of any Public Utility owned or operated by the city, including payment of interest on any bonds or other indebtedness which may be a lien upon such utility. Further specific provision made regarding what moneys are to be paid into this fund and what money is to be paid out for, and the disposition of surplus.

11. General Fund. For the support of other funds and for the payment of such other Expenses of the City as the council may deem proper and which are not payable out of such other funds.

12. Contingent Fund. For the Mayor to pay expenses incurred by him in preserving safety and well being of the city, not payable out of any other fund. Limited to \$300.00.

13. Permanent Improvement Revolving fund. Into this fund are paid the special assessments for Local Improvements, and interest on extended assessments and proceeds of sales of Permanent Improvement Revolving Fund bonds, and out of this fund is also paid money for the Permanent Improvement Revolving Fund bonds as they fall due.

All such funds are in the custody of the Mayor.

Excepting Funds 1, 2, 4, and 5, the aggregate amount levied by general taxation in any one year for all the other funds shall not exceed ten mills. Fund No. 2 shall receive at least one mill. Funds 4 and 5 each not less than one-half mill nor more than three-fourths of a mill.

City council may authorize Mayor to invest sinking fund in bonds or other obligations, and specific provisions are made in detail covering this entire feature.

At first meeting in July, Mayor makes a detailed report to council, or when otherwise requested, showing the condition of the sinking fund and description of its securities, and provisions are made for taking care of deficiencies.

City may by ordinance issue and sell bonds or certificates of indebtedness. Listed are the many things for which bonds are now sold to raise money, in the main similar to the purposes for which bonds are now sold. The most important addition to this section is that relative to certificates of indebtedness, and reads as follows: "The city may sell certificates of indebtedness in an amount not exceeding \$20,000.00, to run not longer than 10 years, for the benefit of the General Fund in case of failure of the anticipated return from other sources of taxation."

Bonds shall not be sold for less than par value and shall bear interest at not to exceed 5 per cent, and under certain conditions, 6 per cent.

Bonded debt of city shall not exceed 10 per cent of the last assessed valuation.

County Auditor's duties are defined with references to keeping account of the various city taxes collected, and payment and transmission of same to the County Treasurer.

On or before October first Mayor submits to the City Council an estimate of the probable expenditure of the city government for the next fiscal year, specially with reference to various funds, also probable income. Council then determines sum to be raised by taxation, statement is transmitted to county auditor and payment thereof is enforced. Council may sell certificates of indebtedness in anticipation of the collection of taxes for any special fund named deficient. Specific provisions are given for time limits and amounts of such certificates.

Mayor shall keep accurate accounts and up to date with reference to all moneys received and paid out by him, from whence received and to what fund credited. Specific provisions are made at length regarding these accounts.

The council shall constitute the Board of Equalization, but perfect a separate organization when they meet.

Every person aggrieved by an assessment shall have the right to appear in person or by attorney before such board.

After Mayor revises assessment rolls according to equalizations, transmits records to county auditor.

Provides for monthly settlements with Mayor by all city officials or employees collecting moneys.

City council designates bi-annually by competitive proposals the banks for depositories of the moneys of the city. Banks give surety bonds.

Mayor makes an annual statement

to council of the total amount of interest received on public funds. Said interest goes to the fund from which it shall have accrued.

Property may be taxed specially by council to pay any judgment recovered against the city. Excess collected for such judgment goes into general fund.

Provision is made regarding recourse by legal appeals against the city for claims for audit disallowed by council.

C. P. Anderson, International Law Expert.

Chandler Parsons Anderson of New York, who has been retained by the department of state in an advisory capacity, is an authority on matters of international law. Mr. Anderson's work will deal mainly with questions coming before the solicitor of the department, and in this capacity will collaborate with Counselor Robert Lansing. It is on these two men that Secretary of State Bryan will rely for legal advice on problems that arise from the European war.

Born in Connecticut forty-nine years ago Mr. Anderson was educated at Yale and the Harvard Law school. He was admitted to the bar in 1891, and since 1899 has had an office in New York. In 1896-7 he was secretary for United States and Great Britain of the Bering Sea claims commissions. Since that time Mr. Anderson has had a wide experience in matters pertaining to international law. He was one of the counsel for the United States before the Alaskan boundary tribunal in 1903, and also in settlement of the Passamaquoddy bay boundary six years later. He was a special counsel for the department of state under Secretaries Root and Knox. In 1910 he was agent for the United States at The Hague in the north Atlantic coast fisheries arbitration and also a delegate to the far seal conference at Washington. During President Taft's administration Mr. Anderson served nearly four years as counselor for the department of state.

## Paid Advertisement.

This advertisement, costing \$2.70 per issue, is authorized and paid for by the Brainerd Law Enforcement League.

## Who Pays the \$21,000 License?

The one argument used by those who would retain the saloons is the need of the license money. A little thought will reveal the fact that even this comes from the same community to which it is returned in the shape of license.

## Do the Brewers and Distillers Pay It?

No, they do not pay it or if they did they would simply add it to the price of the product and the taxpayers and voters who use the beverage would eventually pay it. So, Mr. Voter, our city is nothing ahead there.

## Do the Saloon Keepers Pay It?

No; they simply add it as one of the costs of doing business and again the taxpayers and voters who use it and those dependent upon them must pay it. Again by this route it comes out of the city.

## Honestly, now, Who Pays It?

Have you ever helped poor families who have been made poor either by the direct or indirect influences of liquor? Every time you do you help pay the license money. The city alone contributed over \$1,400.00 to the poor fund in 1914 of which the large portion was used to help those who spent their money with the saloon that they might help the saloons pay the \$21,000 license money. Then individuals and charitable institutions spend far more in helping in precisely the same manner.

## These are They Who Pay!

The wife who is sent to the wash tub while her husband squanders his earnings in the saloon. The children who are denied proper clothing and shoes that an enlightened (?) public might have \$21,000 to pay the expense of the city which they should be ashamed to accept from the iniquitous business. The young man pays it who sells his birthright to a clean manhood and who accepts instead a broken physical body and a career which brings sham to his parents. The child who comes into the world with a blighted mental capacity and a reduced physical being on account of liquor, pays it. The one who is made insane by its blight, pays it. The home disrupted by divorce caused by liquor, pays it. The home broken and the children sent out to shift for themselves at an early age pays it.

## Like Lifting One's Self By The Boot Straps!

Every cent, Mr. Voter, is taken from the community and realize too, that the \$21,000 received in license does not begin to pay the city for the economical loss occasioned by the saloon.

It is a simple problem in economy. Don't be deceived; the \$21,000 is just the money the city cannot afford to accept from the saloon. Think it out for yourself.

THE BRAINERD LAW ENFORCEMENT LEAGUE

## WAVE OF RELIGION.

Searchlight Causes Big Revival in a Panama Hamlet.

War preparations were responsible recently for a temporary revival of religious enthusiasm in the hamlet of Chorrera in Panama. The searchlight installation at the Pacific forts of

the canal has been completed and for several nights practice with the lights was in progress.

The great shafts of light in the sky were noticed at Chorrera, fifteen miles distant, and some of the inhabitants looked upon them as signals from heaven. A religious procession was formed and prayers were said in the church. The parish priest was not

in town the first few nights. When he returned he found it necessary to destroy the most remarkable revival in his memory by informing his people that the lights were not from heaven, but from the forts of the "Americanos." The good man convinced his people, who straightway retired from the church and held a tambour dance in the public square.

## MAKE PLANS FOR CLASS "A" TEAM

Special Baseball Committee Broaches Scheme to Conduct Baseball Affairs on Cash Basis

### BUSINESS MEN AT THE HEAD

Meeting Called for Tuesday Evening, March 16, at Chamber of Commerce Rooms

The special baseball committee of five members, appointed at a recent meeting to draft plans for promoting athletics, especially baseball, have called a meeting at the Chamber of Commerce club rooms for Tuesday evening, March 16, at 8 o'clock of all those interested in athletics of any branch. At this meeting a report will be presented setting forth a plan which has been unanimously agreed upon by every member as being the best for maintaining a Class-A baseball team as well as to conduct the affairs of a team on a strictly business basis.

As was brought out at the last meeting the sentiment seemed to favor placing the management of a team in the hands of a few business men whose standing guaranteed an efficient management. This plan the committee have followed and when the facts are presented, it is believed the report will be adopted without change.

Every fan is invited to attend this meeting and while the attendance at the first meeting was very representative it is hoped the meeting called for Tuesday evening will attract an even larger attendance.

### REPULSE RUSSIAN ATTACKS

Austrians Report Several Successful Encounters.

Washington, March 15.—Repulse of Russian attacks along the lower Nida, at Gorlice and in the Carpathians was announced in a Vienna foreign office dispatch received by the Austro-Hungarian embassy here. The message said:

"Russian advances on the lower Nida and at Gorlice repulsed after sharp fighting.

"In Carpathians the attacks of the enemy failed again in numerous sections. Besides many wounded four hundred unrounded Russian prisoners.

"South of Dulster the enemy's strong infantry attacks broke down with great losses of the enemy. Further east cavalry fighting and infantry again repulsed."

Oysters.

When in their natural condition oysters contain from one-eighth to one-fifth more nutritive material than when fattened. Speaking roughly, a quart of oysters contains on an average about the same quantity of actual nutritive substance as a quart of milk, or three-fourths of a pound of beef, or two pounds of fresh codfish, or a pound of bread. Oysters come nearer to milk than almost any other common food material as regards both the amounts and the relative proportions of nutrients.

### FILING BY PETITION

What Per Cent of Signatures are Necessary and the Time Limit of Filing for City Office

Owing to the fact that those who will become candidates for city offices will in a great measure be by petition it will be interesting to know just what the requirements are. For aldermen or members of the school board a petition containing 10 per cent of the vote cast for governor at the last election in the ward in which the candidate will come before the voters are necessary. For mayor, or any office in which the voters of the entire city participating, 10 per cent of the vote cast for governor at the last election in the city.

Petitions must be filed on or before midnight of March 27th. No man can sign more than one petition for the same office, excepting of course as in the case of aldermen where two are to be elected from the same ward.

### WIFE AND DAUGHTER SLAIN

South Dakota Man Is Missing Following Tragedy.

Aberdeen, S. D., March 15.—Authorities broke into the house of George W. Carlaw at Sisseton, S. D., and found Carlaw's wife and sixteen-year-old daughter dead. They had been killed, the wife with a wrench and the daughter with a butcher knife.

Carlaw had been manager of the Dakota Central Telephone company at Sisseton, but was discharged recently.

Neighbors noticed the live stock on his place had not been fed and on investigation could find no sign of life about the house and broke in when they found Mrs. Carlaw and the girl dead. A team owned by Carlaw is missing and he is believed to have driven south.

### AMERICAN OFFICERS TO EASTERN FRONT.

Berlin, March 15.—A party of six American army officers left Berlin for the Eastern battle front under the guidance of Captain Maltzahn. They recently returned from a tour of inspection of the western line.

The group is composed of Lieutenant Colonel Joseph E. Kuhn of the engineers, Major Clarence C. Williams of the ordnance department, Major Dwight E. Aultman of the field artillery, Captain Samuel D. Rockenbach of the cavalry, Captain Willson B. Burt of the infantry and Captain Samuel G. Shurtle of the coast artillery.

Washing the Dishes.

"Yes, some of us fellows keep house at the fraternity home."

"Don't you hate to wash dishes?"

"We don't have to. We have plenty of candidates for the fraternity, and dish washing is great as an initiation stunt."—Louisville Courier-Journal.

## TOWNSHIP AND VILLAGE ELECTIONS

### Notice

My wife, Addie H. Myers, having left my bed and board, I will not be responsible for any bills she may incur.

Adv. 13 JOSEPH E. MYERS

### IF MEALS HIT BACK AND STOMACH SOURS

"Pape's Diapepsin" Ends Indigestion Gas, Dyspepsia and Stomach Misery in Five Minutes

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of dizziness, heartburn, fullness, nausea, bad taste in mouth and stomach headache, you can get blessed relief in five minutes.

Ask your pharmacist to show you the formula, plainly printed on these fifty-cent cases of Pape's Diapepsin, then you will understand why dyspeptic troubles of all kinds must go, and why they relieve sour, out-of-order stomachs or indigestion in five minutes. "Pape's Diapepsin" is harmless; tastes like candy, though each dose will digest and prepare for assimilation into the blood all the food you eat; besides, it makes you go to the table with a healthy appetite; but, what will please you most, is that you will feel that your stomach and intestines are clean and fresh, and you will not need to resort to laxatives or liver pills for biliousness or constipation.

This city will have many "Pape's Diapepsin" cranks as some people will call them, but you will be enthusiastic about this splendid stomach preparation, too, if you ever take it for indigestion, gases, heartburn, sourness, dyspepsia, or any stomach misery.

Get some now, this minute, and rid yourself of stomach trouble and indigestion in five minutes.—Adv.

### VICTOR HUGO'S EASTER HOPE

I feel in myself the future life. I am like a forest once cut down—the new shoots are stronger and livelier than ever. I am rising, I know, toward the sky. The sunshine is on my head. The earth gives me its generous sap, but heaven lights me with reflection of unknown worlds.

You say the soul is nothing but the resultant of the bodily powers. Why, then, is my soul more luminous when my bodily powers begin to fail? Winter is on my head, but eternal spring is in my heart. There I breathe at this hour the fragrance of the lilacs, the violets and the roses as at twenty years.

When I go down to the grave I can say, like so many others, "I have finished my day's work." But I cannot say, "I have finished my life." My day's work will begin the next morning. The tomb is not a blind alley; it is a thoroughfare. It closes on the twilight; it opens with the dawn.

### MUSIC AND DRAMA

New Management at the Empress  
William Wolf, of Big Stone, S. D., has purchased the Empress theatre and will assume active charge tomorrow. Mr. Wolf has a wide and varied knowledge of the show business having been actively engaged in the Dakotas and Montana for the past several years.

When interviewed Mr. Wolf said: "It is my intention to proceed and improve upon the lines of service laid down by the former management. At all times the show at the Empress will be the best that money can buy. We will use the same service as has been used formerly but will exercise greater care in the selection of the programs. The same will apply to feature pictures also."

"I intend to make the Empress the people's playhouse, and suggestions and complaints by our patrons will always receive careful consideration. A theatre is a place of entertainment and amusement and we want to know what the people like. I heard about the Empress theatre before I came to Brainerd. It has a wonderful radium gold screen and perfect projection scarcely equalled in large cities, and the reputation of having the best pictures in town."

"I wish to impress very forcibly our intention of having a show which will at all times stand up. The Empress has a great reputation for good pictures, but we will improve it."

Mr. Wolf is in Minneapolis making arrangements for feature pictures. The program will be announced at some early date.

### At the Grand

"Master Key" tonight and Tuesday. You will see some splendid seashore scenes taken during the filming of the recovery of the sea-chest from the bottom of the Pacific ocean by Wilson and his men. A special trip was made to the coast in order to secure the proper atmosphere.

The Hindoo Temple scenes are of special interest. This serial is becoming better and more interesting as the end draws near.

Road and Stock Co. for Thursday, Friday and Saturday including Saturday matinee. Sunday's treat was so successful and because of many special requests the Grand booked Howell's Beauty Show again.

### At the Columbia

Today may be seen the most interesting story ever penned called "Monarch and Master." When Francis X. Bushman takes the leading role great things may be expected. "The Girl From Thunder Mountain" is the two-reel play and Ruth Stonehouse takes the title role. A splendid comedy may also be seen. Tomorrow is the big musical day with a lady violinist from Toronto and a company of four other Canadian artists.

### LINER SAFE AT LIVERPOOL

American Ship Had Lifeboats Out Toward End of Journey.

Liverpool, March 15.—The American line steamer New York had an uneventful voyage. The captain of the vessel had prepared for eventualities by having the lifeboats swung out and ready for lowering.

The passengers were interested in reports received by the steamer's wireless of the operation of submarine boats off the Scilly Islands.

### POLITICAL ANNOUNCEMENTS

Saturday Night—"The Wrong Wife"

I have resided at and near Brainerd for ten years. My qualifications are a high school education and a desire to treat all alike. I will pledge my best efforts to the discharge of the duties of the office if elected.

Respectfully,

240tf CLIFFORD A. RUSSELL.

(Political advertisement inserted and paid for at the rate of 5 cents per line per issue by W. H. Onstine.)

### FOR ASSESSOR

For the City of Brainerd

I hereby respectfully announce to the voters of the City of Brainerd, my candidacy for the office of City Assessor at the city election, April 6th, 1915.

I have served four years as deputy auditor of Crow Wing county, have been a resident of Brainerd since 1882, and have been engaged in several branches of the mercantile business.

Should you see fit to elect me, I assure you I will well and faithfully discharge my official duties.

Very respectfully,

Adv. 238 tf W. H. ONSTINE.

### Welcome Information

Most middle aged men and women are glad to learn that Foley Kidney Pills gives relief from languidness, stiff and sore muscles and joints, puffiness under eyes, backache, bladder weakness and rheumatism. They get results. Contain no harmful drugs. H. P. Dunn.—Adv.

### Unforgettable.

"Self consciousness," remarked the man on the car. "is what keeps a fellow from forgetting the fringe on the bottom of his trousers notwithstanding the fact that he can't see it."—Toledo Blade.

### When Iron Doesn't Rust.

Iron which is actually in service in buildings and similar structures, it is found, often behaves in a rather unexpected manner as regards its tendency toward corrosion. Those parts immersed in a few inches of water may corrode with great rapidity, while other parts placed a considerable distance under the surface will remain in practically perfect shape almost indefinitely. Similar conditions are found in parts buried in the ground. The explanation is to be found in the fact that both water and oxygen are necessary to produce corrosion. If therefore iron parts are immersed in water or buried in the ground to a depth greater than that to which oxygen can penetrate they will be preserved because the conditions for corrosion have not been attained.—Engineering Magazine.

### After Food, Not Footwear.

English Waiter—Nice fillet of sole, sir? Diner—No. What else have you? Waiter—Ow would you like some stewed heels, sir? Diner—Sole! Heels! Say, is this a restaurant or a cobbler's shop?—Boston Transcript.

Get some now, this minute, and rid yourself of stomach trouble and indigestion in five minutes.—Advt.

### VICTOR HUGO'S EASTER HOPE.

I feel in myself the future life. I am like a forest once cut down—the new shoots are stronger and livelier than ever. I am rising, I know, toward the sky. The sunshine is on my head. The earth gives me its generous sap, but heaven lights me with reflection of unknown worlds.

You say the soul is nothing but the resultant of the bodily powers. Why, then, is my soul more luminous when my bodily powers begin to fail? Winter is on my head, but eternal spring is in my heart. There I breathe at this hour the fragrance of the lilacs, the violets and the roses as at twenty years.

When I go down to the grave I can say, like so many others, "I have finished my day's work." But I cannot say, "I have finished my life." My day's work will begin the next morning. The tomb is not a blind alley; it is a thoroughfare. It closes on the twilight; it opens with the dawn.

### MUSIC AND DRAMA

**New Management at the Empress**  
William Wolf, of Big Stone, S. D., has purchased the Empress theatre and will assume active charge tomorrow. Mr. Wolf has a wide and varied knowledge of the show business having been actively engaged in the Dakotas and Montana for the past several years.

When interviewed Mr. Wolf said: "It is my intention to proceed and improve upon the lines of service laid down by the former management. At all times the show at the Empress will be the best that money can buy. We will use the same service as has been used formerly but will exercise greater care in the selection of the programs. The same will apply to feature pictures also."

"I intend to make the Empress the people's playhouse, and suggestions and complaints by our patrons will always receive careful consideration. A theatre is a place of entertainment and amusement and we want to know what the people like. I heard about the Empress theatre before I came to Brainerd. It has a wonderful radium gold screen and perfect projection scarcely equalled in large cities, and the reputation of having the best pictures in town."

"I wish to impress very forcibly our intention of having a show which will at all times stand up. The Empress has a great reputation for good pictures, but we will improve it." Mr. Wolf is in Minneapolis making arrangements for feature pictures. The program will be announced at some early date.

### At the Grand

"Master Key" tonight and Tuesday. You will see some splendid seashore scenes taken during the filming of the recovery of the sea-chest from the bottom of the Pacific ocean by Wilkinson and his men. A special trip was made to the coast in order to secure the proper atmosphere.

The Hindoo Temple scenes are of special interest. This serial is becoming better and more interesting as the end draws near.

Road and Stock Co. for Thursday, Friday and Saturday including Saturday matinee. Sunday's treat was so successful and because of many special requests the Grand booked Howell's Beauty Show again.

### At the Columbia

Today may be seen the most interesting story ever penned called "Monogamy and Master." When Francis X. Bushman takes the leading role great things may be expected. "The Girl From Thunder Mountain" is the two-reel play and Ruth Stonehouse takes the title role. A splendid comedy may also be seen. Tomorrow is the big musical day with a lady violinist from Toronto and a company of four other Canadian artists.

### LINER SAFE AT LIVERPOOL

American Ship Had Lifeboats Out Toward End of Journey.

Liverpool, March 15.—The American line steamer New York had an uneventful voyage. The captain of the vessel had prepared for eventualities by having the lifeboats swung out and ready for lowering.

The passengers were interested in reports received by the steamer's wireless of the operation of submarine boats off the Scilly Islands.

### POLITICAL ANNOUNCEMENTS

Political advertisement inserted and paid for at the rate of 10 cents per line per issue by A. L. Hoffman.

### FOR ASSESSOR

Offering my experience of thirty-two years in the general merchandise and real estate business in Brainerd as my qualifications for the office of assessor, I respectfully ask your support at the coming election, believing that I can make a just assessment that will be satisfactory to all, if elected.

I am yours Respy.,  
A. L. HOFFMAN.

(Political advertisement inserted and paid for at the rate of 5 cents per line per issue by Andrew Anderson.)

### Candidate for Alderman

I wish to announce to the voters of the Fourth Ward that I am a candidate for alderman and solicit their votes at the coming election on April 6th.

2496f ANDREW ANDERSON.

(Political advertisement inserted and paid for at the rate of 5 cents per line per issue by Clifford A. Russell.)

### To the Voters of Brainerd

I wish to announce myself as a candidate for the office of Assessor.

## Now is the Time to do Easter Shopping

Easter is Less Than Three Weeks Off

We received New Suits and New Coats this morning and more are coming in daily. Now is the time to select your new Easter garments.

And, by the way, do you know that the most satisfied woman is the one who selects her Easter Coat, Suit or Hat at the earliest possible moment.

Our sales people are most courteous and will gladly acquaint you with all this newness at your pleasure. We hope to see you soon.

## AT YOUR SERVICE

That phase in this store means something.

It means that you will be shown what you ask for. Anything less than satisfying you completely in fabric, fit, and price will make the bargain incomplete.

And that phase means, too, that the clothes we sell—Sincerity and L-System clothes will be at your service for many, many months after you buy them. Priced at \$15.00 to \$25.00.

The sort of things you'll like to wear are here and every price we quote will be a pleasing and satisfactory one.

Let us show you.

BYE & PETERSON  
"THE GOOD CLOTHES STORE"

### When Iron Doesn't Rust.

Iron which is actually in service in buildings and similar structures, it is found, often behaves in a rather unexpected manner as regards its tendency toward corrosion. Those parts immersed in a few inches of water may corrode with great rapidity, while other parts placed a considerable distance under the surface will remain in practically perfect shape almost indefinitely. Similar conditions are found in parts buried in the ground. The explanation is to be found in the fact that both water and oxygen are necessary to produce corrosion. If therefore iron parts are immersed in water or buried in the ground to a depth greater than that to which oxygen can penetrate they will be preserved because the conditions for corrosion have not been attained.—Engineering Magazine.

### After Food, Not Footwear.

English Walter—Nice fillet of sole, sir? Diner—No. What else have you? Walter—Ow would you like some stewed heels, sir? Diner—Sole! Heels! Say, is this a restaurant or a cobbler's shop?—Boston Transcript.

## Field Of Sport

### TROPHY SHOOT ENDS IN A TIE

Art C. White and George Trent, Jr.,  
Each Record 85 at Gilbert  
Trophy Shoot Sunday

### 17 SHOOTERS ON THE RANGE

Good Scores Made in Spite of Cold,  
Snowy Weather and Stiff Head  
Wind Blowing

Art C. White and George Trent, Jr., tied for first place in the Gilbert Twentieth Anniversary shoot held Sunday afternoon at the Riverside Gun club grounds, the popular president and the secretary-treasurer each scoring 85 hits out of 100 targets. At the earliest possible date, probably on the next shoot of the gun club, the tie will be shot off and the beautiful silver cup awarded the winner.

In 1911 White won the diamond badge awarded by the old St. Paul Beard of Trade. Young Trent's father, George Trent, Sr., twice won the diamond badge. This accounts, in a measure, for the shooting skill shown by White and Trent, Gilbert cup contestants.

The cup, a fine example of the silver smith's art, reposes on a black velvet dais at the Murphy haberdashery window on Front street, where admiring sportsmen have glanced at its symmetrical proportions. The cup was awarded by the Dupont Powder Co., of Wilmington, Delaware.

Seventeen shooters were at the trophy shoot and good scores were made in spite of the cold and snowy weather, and the head wind which blew in the face of the trapshooters. Three visitors were present from Cuyuna, Frank Buchanan, Ed. Rhodes and Mr. Thompson.

Scores made out of 100 targets are as follows:

19 yards handicap:	
George Trent, Sr.	84
A. C. White	85
George Trent, Jr.	85
18 yards handicap:	
J. C. Davis	66
H. W. Linnemann	72
17 yards handicap:	
L. M. Schulstad	73
Frank Buchanan	61
16 yards handicap:

JOHN GAVIN

—Courtesy Minneapolis Tribune.

The hero of the above, John Gavin, is well known to Brainerd people. John Gavin has been a machinist apprentice in the Northern Pacific railway shops in Brainerd and has played ball, good ball, in the Brainerd team, holding down the catcher's position.

In batting he showed that he had a good eye and his base running also attracted attention. Young Gavin made hosts of friends in Brainerd. He was recommended to Connie Mack by Alderman D. A. Peterson, manager of the Brainerd baseball team and the young recruit is now at Jacksonville, Florida, at the Athletics training camp and is being given a try-out.

The thing to commend Gavin to any manager is his smooth, unruffled temper and his ability to fit in with a team and make himself part of a machine. His career in the south will be followed with interest and all Brainerd fans hope he lands a berth with Connie Mack.

The Brainerd Dispatch is indebted to the Sporting Editor of the Minneapolis Tribune for the above picture. It is made from the only photograph in existence, and now in possession of his mother. The snapshot shows Gavin and his friend, Vere Keeley, jeweler at Houghton's, holding hands and gazing into the future. The Minneapolis Tribune ran the picture and then the Sporting Editor kindly loaned it to the Brainerd Dispatch to be displayed to an admiring public in this baseball town. The Tribune, by the way, features "Sport While It's News."

Mr. and Mrs. John J. Gavin, parents of Catcher Gavin, first resided in Brainerd when Gavin, Sr., an engineer of the Northern Pacific railway, had a run out of Brainerd. Later, Mr. Gavin had a run on the Minnesota division and the family then made their home in Staples. Mrs. Gavin was a school teacher, kind, considerate and possessed of keen perception. Mr. Gavin is one of the best railway men in the service. Characteristics of both parents are inherited by young John and they do come in handy in the baseball world.

A sister, living in St. Paul, married the son of a prominent banker. A brother, Lowrie Gavin, is a mining engineer on the Mesabi range. John is 20 years old and has the stuff and the stamina and all Brainerd hopes he gets a toe hold on the bag near the batter and lands a berth with Connie Mack.

"Our hopes, our aspirations, our boosting, they're all with you, John."

### BEMIDJI FIVE BEAT ROYALTON

Special to Dispatch:

Bemidji, March 15.—Bemidji high school basketball players last night defeated the Royalton high school five by a score of 57 to 12, in the last game before the departure of the local team to participate in the state championship tournament at Northfield next Wednesday. The Bemidji team is champion of the sixth district.

On the return of the local players from Little Falls, where the high school team of that village was decisively defeated, they were accorded an enthusiastic reception. Complimentary addresses were made by Supt. W. P. Dwyer and Miss Elizabeth Lowe, principal.

The Bemidji team will play the Two Harbors five Monday, Tuesday and Wednesday nights in the Lake county village.

#### Baseball Curves

Chief Bender, who was signed by the Baltimore Federals, declares that Eddie Collins will be a serious loss to the Mackmen. "Eddie Collins' loss will be the worst kind of a blow to the pennant aspirations of Connie Mack," asserted Bender. "Collins is a wonder and will help to give the Chicago White Sox a powerful infield. If I were asked to pick the star players of the world I would name Collins first and Ty Cobb second."

Connie Mack has given out a statement to the effect that he is strong for the tango as an aid to base running—that the steps and lightly graceful movements of the dance help a runner to develop speed and agility.

In Sunday's Duluth News Tribune under the two column heading, "Duluth Pitching Squad is Increased to 17 Men" occurs the sub-head, "Kid Brother of 'Bullet Joe' Bush of Brainerd has been signed by Blum." The story reads that "Darby O'Brien, manager of the Dooks, yesterday signed three additional pitchers and increased his slab squad to 17 men. A kid brother of 'Bullet Joe' Bush, of Athletic fame, and hailing from Brainerd, Minn., was signed. The kid says his big brother has given him a few pointers on the manly art of pitching and that he is a curly wildcat himself. He will get a try-out—and a good one at that."

Crosby is anxious for a ball team this year and is even talking about a Crosby-Ironton combination, so as to enter the league. George H. Crosby, whose bent is now to boost agriculture as well as mining, has ordered the baseball field in Crosby plowed up and planted with onions.

A. H. Proctor, cashier of the First National bank of Ironton, says the baseball fever is reaching a high temperature in his town and that a team will be formed. Last year Proctor's colts nearly beat the boasting Verdades. Mr. Proctor says there's lots of good baseball material in Ironton and on the range.

### LEITER BLAMES FARMERS FOR RISE IN WHEAT

Tells Investigators They, Not Speculators, Cause Dear Bread.

Joseph Leiter, who tried to corner wheat eighteen years ago and failed because he underestimated the crop, told the New York state attorney general's investigating committee about the increase in the cost of bread. He defended the Chicago wheat pit, its operators and wheat speculators.

He declared that speculation had nothing to do with the rise in the price of wheat; that the present price is created by legitimate demand; that the elimination of speculation in foodstuffs would cause the farmers to get together and form a price fixing trust.

"If," he said, "you confine dealings to actual cash grain transactions and stop dealing in futures the business would immediately become highly speculative. The miller would have to take his profits right away. Gamblers would take the place of legitimate dealers and the gamblers would exact a real toll of the consumer."

"The man who buys for a few points' rise or fall in wheat might just as well put his money into a faro bank. But you cannot stop legitimate speculation."

"What will the next change in the wheat market be? You'll see it jumping up and falling down because there is no speculation."

"The United States has controlled wheat prices since Sept. 1, 1914, and will continue to do so until the new crop comes. The high prices are due to the farmer, who is holding his wheat."

"There is nobody left in the speculative market. The speculators got out after wheat passed the \$1.40 mark. They were either squeezed or frightened out. The rise would have come sooner had it not been for the speculators."

Mr. Leiter denied that the owners of the great grain elevators are holding wheat in order to make a corner.

DISPATCH ADS PAY

### YOUNG FOLKS' CORNER

#### Men In Boy Scout Movement.

The number of men who have joined the Boy Scouts of America movement as leaders of troops or members of councils has increased steadily in the past year. The report of the chief scout executive showed that at present 25,804 men are serving voluntarily in the scout movement. These consist of 6,016 enrolled as scoutmasters and assistants, 353 commissioners, 12,041 members of troop committees, 4,320 members of local councils and 174 members of the national council and its committees.

Since the beginning of the scouting the biggest problem has been to obtain adult leaders of boys in their various character-building activities. This problem remains, for the number which can be of great service to boys in scout work is without limit, there being, according to the census, more than 9,000,000 boys in the United States between the ages of ten and twenty. But the records indicate that the number of those serving as leaders is growing rapidly. It means not only that more boys are obtaining the pleasures and benefits of the scout program, but that the boys enrolled in the movement are getting greater pleasures and greater benefits than before.

#### Why the Opal is Unlucky.

A rich nobleman once owned a beautiful ring in which was set a large opal of the most brilliant hues, which was an heirloom in his family and had the magic property of bringing good fortune to the possessor, though the condition attached to it said it must be given to the best beloved son else its magic virtue would be lost. The nobleman had three sons, all equally loved by the father, so when the time came that he must part with the opal and not being able to decide upon

## PEERLESS Long Cut Tobacco

has been a prize favorite with printers and all live, hustling he-boys for fifty years.

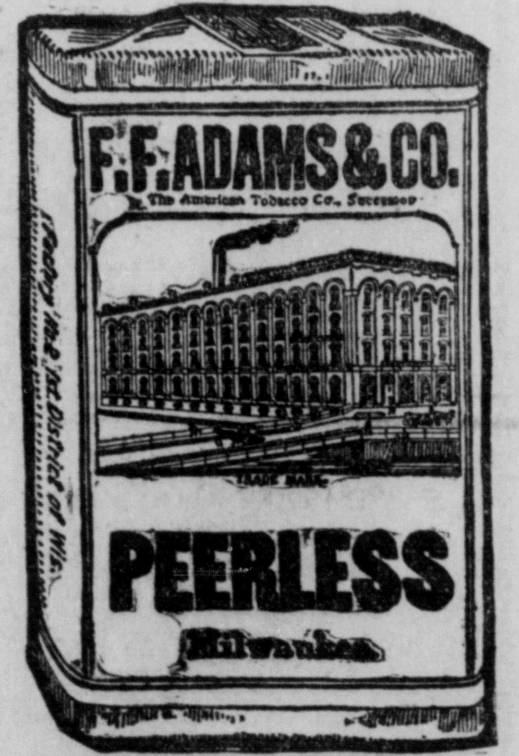

We've kept PEERLESS quality right up to top notch for half a century. We don't let PEERLESS go out of the factory until the tobacco has been aged from three to five years, so that all the rich, mellow, natural sweetness of its Southern Kentucky leaf is at its best.

When you're tobacco hungry, you want clean, honest, juicy tobacco with some back-bone to it. You never see a PEERLESS user switch to some other brand. He knows nothing can compare with PEERLESS for downright tobacco satisfaction.

A week's trial of PEERLESS will prove this to you—will make you a permanent user of PEERLESS. Sold everywhere in 5c packages.

Other sizes in 10c, 20c and 40c Packages, and 45c Tin Pails.

which son to bestow the precious gem he had two rings made exactly like the charmed one, in which he had imitation opals set so like the real one that no one could have detected any difference. Then, calling his sons, one by one, into his room, he presented each with a ring, telling him it was the wonder working opal, but charging each not to mention it to his brothers.

The fairies, however, who were responsible in the first place for the luck bringing ring, were indignant at the deceit and took away the charm, and the legend says that ill luck and disaster have followed the opal ever since.

#### BRAINERD FOLKS

##### ASTONISH DRUGGIST

We sell many good medicines but we are told the mixture of buckthorn bark, glycerine, etc., known as Adler-I-ka, is the best we ever sold. Brainerd folks astonish us daily by telling how QUICKLY Adler-I-ka relieves sour stomach, gas on the stomach and constipation. Many report that A SINGLE DOSE relieves these troubles almost IMMEDIATELY. We are glad we are Brainerd agents for Adler-I-ka. Johnson's Pharmacy.

### Winners Diamond Badge Trophy

Bill Brown, Minneapolis	1914
Stokke	1913
Goward, Aitkin	1912
A. C. White, Brainerd	1911
Vern Sugrue, Cuyuna	1910

George Trent, Sr., held it two years in the early history of the badge. No one, however, has won it three times in succession, thus giving permanent possession.

### Storey Wins at Duluth

Tom Storey, of the Central Gun club, won the Gilbert Trophy cup in the match in Duluth at the Northwestern club grounds. His score was 77 out of a possible 100. His score is 8 points below Brainerd's tie record.

Sunday afternoon members of the Northwestern Gun club, of Duluth, competed for a like trophy and a score of guns was expected present.

### An Ideal Athletic Plant.

The new pavilion and center stand of the Queen's Park Football club at Hampden park, Glasgow, are very imposing, up to date structures. Above the center stand is the press box, with seating accommodations for 102 knights of the pencil, and immediately in front of the press box is an electrical clock, which is an innovation in the appearances of Scottish football fields.

The reading room, an apartment measuring 40 by 20 feet; the board room, room for the use of the secretary and treasurer, bathrooms, with huge baths, plunge baths, etc.; drying room, gymnasium and referee's room are all on the ground floor. On the first floor is a large tea room for ladies and directors' room. This is one of the leading soccer clubs of Great Britain.

### McFarland May Come Back.

Packey McFarland is again threatening to come back for that long talked of bout with Mike Gibbons. The Chicago boxer will find few willing to believe that he is seriously considering such a match, however. There is no particular reason to think that McFarland would be a dangerous opponent for the St. Paul middleweight, especially now that he has been on the retired list so long. From all accounts McFarland is plenty big enough to tackle the job without having to give away weight. Since he retired his shoulders have broadened and his limbs have thickened. He is now a bigger man than Gibbons, but there is little doubt that his former speed has departed never to return.

JOHN GAVIN

—Courtesy Minneapolis Tribune.

The hero of the above, John Gavin, is well known to Brainerd people. John Gavin has been a machinist apprentice in the Northern Pacific railway shops in Brainerd and has played ball, good ball, in the Brainerd team, holding down the catcher's position.

In batting he showed that he had a good eye and his base running also attracted attention. Young Gavin made hosts of friends in Brainerd. He was recommended to Connie Mack by Alderman D. A. Mr. Gavin is one of the best railway men in the service. Characteristics of both parents are inherited by young John and they do come in handy in the baseball world.

A sister, living in St. Paul, married the son of a prominent banker. A brother, Lowrie Gavin, is a mining engineer on the Mesabi range. John is 20 years old and has the stuff and the stamina and all Brainerd hopes he gets a toe hold on the bag near the batter and lands a berth with Connie Mack.

"Our hopes, our aspirations, our boasting, they're all with you, John."

### Quick Action Wanted

When one is coughing and spitting—with tickling throat, tightness in chest, soreness in throat and lungs—when head is aching, and the whole body racked with a cough that won't permit sleep—he wants immediate relief. Thousands say Foley's Honey and Tar Compound is the surest and quickest acting medicine for coughs, colds, croup and la grippe. H. P. Dunn.—Adv't. mwf

## BEMIDJI FIVE BEAT ROYALTON

### Special to Dispatch:

Bemidji, March 15—Bemidji high school basketball players last night defeated the Royalton high school five by a score of 57 to 12, in the last game before the departure of the local team to participate in the state championship tournament at Northfield next Wednesday. The Bemidji team is champion of the sixth district.

On the return of the local players from Little Falls, where the high school team of that village was decisively defeated, they were accorded an enthusiastic reception. Complimentary addresses were made by Supt. W. P. Dwyer and Miss Elizabeth Lowe, principal.

The Bemidji team will play the Two Harbors five Monday, Tuesday and Wednesday nights in the Lake county village.

### Baseball Curves

Chief Bender, who was signed by the Baltimore Federals, declares that Eddie Collins will be a serious loss to the Mackmen. "Eddie Collins' loss will be the worst kind of a blow to the pennant aspirations of Connie Mack," asserted Bender. "Collins is a wonder and will help to give the Chicago White Sox a powerful infield. If I were asked to pick the star players of the world I would name Collins first and Ty Cobb second."

Connie Mack has given out a statement to the effect that he is strong for the tango as an aid to base running—that the steps and lightly graceful movements of the dance help a runner to develop speed and agility.

In Sunday's Duluth News Tribune under the two column heading, "Duluth Pitching Squad is Increased to 17 Men" occurs the sub-head, "Kid Brother of 'Bullet Joe' Bush of Brainerd has been signed by Blum." The story reads that "Darby O'Brien, manager of the Dooks, yesterday signed three additional pitchers and increased his slab squad to 17 men. A kid brother of 'Bullet Joe' Bush, of Athletic fame, and hailing from Brainerd, Minn., was signed. The kid says his big brother has given him a few pointers on the many art of pitching and that he is a curly wildcat himself. He will get a try-out—and a good one at that."

Crosby is anxious for a ball team this year and is even talking about a Crosby-Ironton combination, so as to enter the league. George H. Crosby, whose bent is now to boost agriculture as well as mining, has ordered the baseball field in Crosby plowed up and planted with onions.

A. H. Proctor, cashier of the First National bank of Ironton, says the baseball fever is reaching a high temperature in his town and that a team will be formed. Last year Proctor's colts nearly beat the boasting Verdales. Mr. Proctor says there's lots of good baseball material in Ironton and on the range.

## LEITER BLAMES FARMERS FOR RISE IN WHEAT

Tells Investigators They, Not Speculators, Cause Dear Bread.

Joseph Leiter, who tried to corner wheat eighteen years ago and failed because he underestimated the crop, told the New York state attorney general's investigating committee about the increase in the cost of bread. He defended the Chicago wheat pit, its operators and wheat speculators.

He declared that speculation had nothing to do with the rise in the price of wheat; that the present price is created by legitimate demand; that the elimination of speculation in foodstuffs would cause the farmers to get together and form a price fixing trust.

"If," he said, "you confine dealings to actual cash grain transactions and stop dealing in futures the business would immediately become highly speculative. The miller would have to take his profits right away. Gamblers would take the place of legitimate dealers and the gamblers would exact a real toll of the consumer."

"The man who buys for a few points' rise or fall in wheat might just as well put his money into a faro bank. But you cannot stop legitimate speculation."

"What will the next change in the wheat market be? You'll see it jumping up and falling down because there is no speculation."

"The United States has controlled wheat prices since Sept. 1, 1914, and will continue to do so until the new crop comes. The high prices are due to the farmer, who is holding his wheat."

"There is nobody left in the speculative market. The speculators got out after wheat passed the \$1.40 mark. They were either squeezed or frightened out. The rise would have come sooner had it not been for the speculators."

Mr. Leiter denied that the owners of the great grain elevators are holding wheat in order to make a corner.

## YOUNG FOLKS' CORNER

### Men In Boy Scout Movement.

The number of men who have joined the Boy Scouts of America movement as leaders of troops or members of councils has increased steadily in the past year. The report of the chief scout executive showed that at present 25,804 men are serving voluntarily in the scout movement. These consist of 5,916 enrolled as scoutmasters and assistants, 333 commissioners, 12,041 members of troop committees, 4,320 members of local councils and 174 members of the national council and its committees.

Since the beginning of the scouting the biggest problem has been to obtain adult leaders of boys in their various character building activities. This problem remains, for the number which can be of great service to boys in scout work is without limit, there being, according to the census, more than 9,000,000 boys in the United States between the ages of ten and twenty. But the records indicate that the number of those serving as leaders is growing rapidly. It means not only that more boys are obtaining the pleasures and benefits of the scout program, but that the boys enrolled in the movement are getting greater pleasures and greater benefits than before.

### Why the Opal is Unlucky.

A rich nobleman once owned a beautiful ring in which was set a large opal of the most brilliant hues, which was an heirloom in his family and had the magic property of bringing good fortune to the possessor, though the condition attached to it said it must be given to the best beloved son else its magic virtue would be lost. The nobleman had three sons, all equally loved by the father, so when the time came that he must part with the opal and not being able to decide upon

which son to bestow the precious gem he had two rings made exactly like the charmed one, in which he had imitation opals set so like the real one that no one could have detected any difference. Then, calling his sons, one by one, into his room, he presented each with a ring, telling him it was the wonder working opal, but charging each not to mention it to his brothers.

The fairies, however, who were responsible in the first place for the luck bringing ring, were indignant at the deceit and took away the charm, and the legend says that ill luck and disaster have followed the opal ever since.

#### ASTONISH DRUGGIST

We sell many good medicines but we are told the mixture of buckthorn bark, glycerine, etc., known as Adler-l-ka, is the best we ever sold. Brainerd folks astonish us daily by telling how QUICKLY Adler-l-ka relieves sour stomach, gas on the stomach and constipation. Many report that A SINGLE DOSE relieves these troubles almost IMMEDIATELY. We are glad we are Brainerd agents for Adler-l-ka. Johnson's Pharmacy.

## First Thing in the Case

the Printer always picks is PEERLESS.

Not "Pi", Mr. Printer, but P-I-E. It's the real old toothsome pie for you, too, when you get hold of PEERLESS tobacco. You're never mugged up when you've got PEERLESS. It's a rich, healthy smoke or chew; and the printer is glad of a chance to use printer's ink to tell the rest of the world how good it is.

## PEERLESS Long Cut Tobacco

has been a prize favorite with printers and all live, hustling he-boys for fifty years.

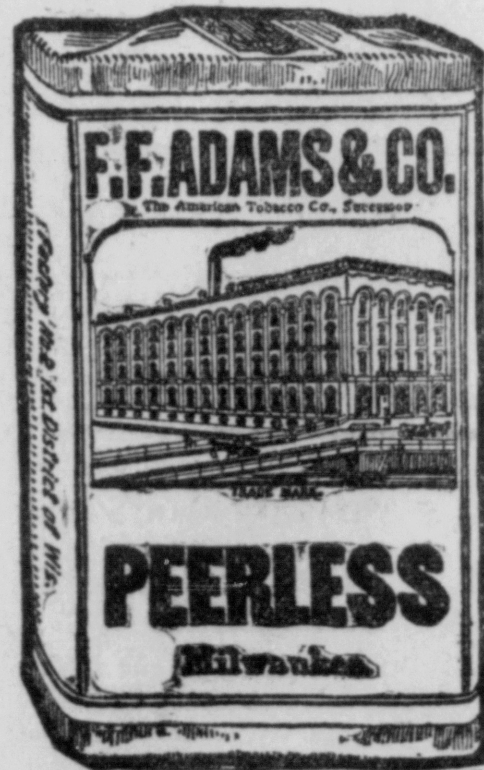

We've kept PEERLESS quality right up to top notch for half a century. We don't let PEERLESS go out of the factory until the tobacco has been aged from three to five years, so that all the rich, mellow, natural sweetness of its Southern Kentucky leaf is at its best.

When you're tobacco hungry, you want clean, honest, juicy tobacco with some backbone to it. You never see a PEERLESS user switch to some other brand. He knows nothing can compare with PEERLESS for downright tobacco satisfaction.

A week's trial of PEERLESS will prove this to you—will make you a permanent user of PEERLESS. Sold everywhere in 5c packages.

Other sizes in 10c, 20c and 40c Packages, and 45c Tin Packs.
